

DEATHS

MRS. JOE DALRY
Funeral services for Deborah K. Dalry, 24, were conducted Dec. 22, 1980 at the Richardson and Hunt Funeral Home, Oesterville. Burial was in Logansview Cemetery, Bethel.
Mrs. Dalry died Dec. 15, 1980 following an auto accident.
She was the daughter of Mrs. Nora McIntyre of Bethel and Herman Michael of Nicholas County.
Surviving besides her parents are her husband, Joe Dalry; a daughter, Tammy Jo, both of Bethel; a sister, Mary Michael of Bethel; and a brother, Donnie Sams of Nicholas County.

DR. E. EVANS BROWN
Dr. E. Evans Brown, 72, 196 Mallard Lane, died Wednesday, Dec. 31, 1980 in Asheville, North Carolina.
A native of Wall Hall, South Carolina, son of the late Lewis and Anna Mary Evans Brown, graduate of the University of South Carolina and the Union Field Theological Seminary, Richmond, Va., studied in Cambridge University in England and the University of Edinburgh in Scotland. He was a member of the Transylvania (Union) Presbytery.

Survivors are his wife, Jessie Terrie Stevens Brown; three daughters, Dr. Mary Ellen Brown, Mrs. Dicks McKel Jr., Dr. Susan Evans Brown; four grandchildren; two sisters and one brother.
Memorial services were held 10 a.m. Wednesday, Jan. 7, 1981 at the First Presbyterian Church with Dr. Edward T. Mease officiating. Private burial in the Winchester Cemetery.

MRS. CONN TUDOR
Mrs. Mayme McQuerry Tudor, 82, widow of Conn Tudor, died Wednesday, Dec. 21, 1980 at the Nicholas County Place.
She was a member of the Good Hope Baptist Church.
She is survived by two daughters, Mrs. Bob (Patsie) Newman, Lexington, and William A. (Shirley) Wilson, Carlisle; one son, Harry Tudor, South-ern Plains, N. Carolina; three brothers, John, Jim and Francis McQuerry, all of Paint Lick; two sisters, Mrs. Jessa Collins, Lancaster; and Mrs. Frank Miller, Paint Lick; eight grandchildren, four great grandchildren and several nieces and nephews.

Funeral services were conducted Friday at Hamney Funeral Home, Lancaster, officiated by Rev. Jimmy Giles. Burial in Paint Lick Cemetery.

Environmental problems with shale oil

pointing of spent shale after the oil is removed may result in leaching, causing contamination of underground water supplies.

Excising state and federal regulations.

Farmers receive prices in December

Prices received by Kentucky farmers were down for most crops and livestock in December. Excessives were prices for hay, milk cows, egg milk, beef cattle prices were at their lowest level since December 1978. Calf prices also dipped to their lowest level since November 1978. While livestock prices continue to decline, prices paid for hogs (38.47 cents) and laying fowls were only increased for December. Hog-feed (38.47 cents) and laying fowls were only increased for December.

The December Index of Prices Received by Farmers decreased 3 points (1.1 percent) to 281.28 percent of 1967 average. Contributing most to the decrease since November were lower prices for apples, beans, oranges, wheat, hogs, cattle and lettuce. Higher prices for egg, corn, peanuts, tobacco and rice were partially offsetting. The Index was 22 points (8.2 percent) above a year ago.

The Index of Prices Paid by Farmers for commodities and services, interest, taxes and wage rates for Dec. 19 was 201, up 1 point (3 percent) from mid-November. Higher prices for food, fuel and energy, and family living items were the major contributors to the increase. The Index was 21 points (12 percent) above a year earlier.

The unadjusted Consumer Price Index for all Urban consumers in November was 562.2, up .9 percent from October and 12.6 percent above a year earlier. On a seasonally adjusted basis, the CPI-U rose 1.0 percent. The transportation component of the index rose 1.3 percent, primarily reflecting price increases for motor vehicles and gasoline. The food and beverage index rose 1.1 percent, while the housing index was up 1.0 percent as interest rates and house prices increased. The other goods and services and medical care indexes each rose .6 percent, while the apparel and upkeep and entertainment indexes increased 3 percent each.

cooperatively with the attorney general's office.

A hearing is then held and the results go to the Bureau of Vehicle Regulation with a recommendation. The board then votes on the decision reached by the bureau, Runke said.

Current members of the Motor Vehicle Dealer Board are: Eric Bates, Elizabethtown; Sam Boden, Frankfort; James Butts (consumer), Pulaski; John Daubert, Louisville; Elmer Gambrel, Corbin; Robert Little, Paducah; Bo Queen, Mt. Vernon; Roy Roberts (manufacturer), Louisville; James Sims (wholesale), Louisville; Albert Sibley, Irvineville; Tom Zimmerman, Florence; James Runke, Commissioner of Vehicle Regulation.

But Jamie Green, secretary for the board, said they get help and support from the state police since the field inspectors were abolished. Board members also offer outside support. "Sometimes a board member will go out and check on a dealer in their area if there is a question about it," she said.

When a complaint is filed against a dealership, the board will ask the attorney general's office for an opinion on it, Runke said. "The Secretary" (Transportation Secretary F. R. M. Metts) philosophy is that we are not an enforcing agency," he said. "We work

While shale oil has been touted as a virtually limitless energy resource, and one that could benefit Kentucky economically because of the state's large shale deposits, the 1980-81 Interim Legislative Record reports that a legislative committee has received word that the mining and production of shale fuel may have serious environmental consequences.

Nearby Osborne, an executive assistant in the Department for Natural Resources and Environmental Protection, said solid waste disposal and water resources were two key areas of concern in shale oil production.

Osborne told members of the Interim Joint Committee on Agriculture and Natural Resources that 75 percent of material extracted in shale mining is solid waste, and while that material will probably not be formally classified as "hazardous," it could produce potential health hazards.

She also said disposal of that solid waste will take a considerable amount of land. A shale refining facility producing 50,000 barrels of oil per day would disturb from 2,500 to 3,000 acres over a 20-year period, she said.

Water is another likely problem area, Osborne said, citing preliminary results from a Buffalo Trace Area Land Use and Resource Study which concludes more than 2,000 gallons of water per minute will be needed to operate a 30,000 longer-day oil shale processing plant.

She said that quantity of water may not be readily available at state sites distant from the Ohio River.

Beyond the vast amount of water needed, there may also be "water pollution problems associated with the extraction process, Osborne said dis-

tributing groundwater and air pollution and solid and hazardous waste will apply to oil-shale mining, as they would apply to petro-chemical industry, Osborne said.

From the data obtained in that study, Miller estimated that 2 1/2 feet of overburden material must be removed for each foot of shale recovered in that area.

Although the Legislature has directed the Natural Resources department to develop regulations for oil-shale mining and production in the state, no funds have been appropriated for studies in the area.

Because of that, Osborne said, staff people have been "borrowed" from other programs in the department. She cited one Bureau of Surface Mining employee who works full-time on oil shale research, while a dozen others have helped out with specific projects.

The department has gathered existing oil shale regulations from other states to use as a basis for Kentucky's program, Osborne said.

The department has also applied for a number of study grants, including one from the Ohio River Basin Commission to assess the leaching characteristics of raw shale and overburden materials, and spent shale from at least five state locations.

Studies are also planned on waste disposal, program development, and the types of vegetation shale and other disturbed materials can support.

The state Department of Energy will do the research under a memorandum of agreement with the Natural Resources agency, representing the Buffalo Trace area.

to Trace development district, said the federal Department of Energy had approved \$250,000 to analyze ten core samples of Kentucky shale from the Lewis-Passing County area.

Miller estimated that 2 1/2 feet of overburden material must be removed for each foot of shale recovered in that area.

Motor Vehicle Dealer Board is our watchdog

Whenever someone in Kentucky buys a new or used car from a licensed dealer, they can be sure the Motor Vehicle Dealer Board is working for them as a consumer watchdog.

Protecting the consumer from car dealerships that do not operate legitimately is the main function of the Motor Vehicle Dealer Board.

The 12-member board consists of the commissioner of vehicle regulation and 11 members. They have the authority to approve all permanent applications for licenses for any kind of vehicle dealership in the state.

The board will deny a license if anything looks suspicious about the business, said John Tinsley, supervisor of the board. "We run a felony check on each applicant to make sure they were never involved in anything like car theft or odometer rollbacks," Tinsley said.

A license applicant must meet certain requirements to receive approval by the board. These include a list for the dealership, an office that does not

NOTICE

Listing Period — Homestead Exemption

The PVA office is now in the listing period—January 1 to March 1—for the tax roll preparation for 1981. Each taxpayer should report his property at this time.

- All new homes, improvements to existing homes, and new buildings (barns etc.)
- All mobile homes located in Nicholas County. Mobile homes that have been sold during the year should be reported.
- Cars, boats, travel trailers, etc.
- Intangibles (stocks, bonds, mortgages, liens and accounts receivable.)

Homestead Exemption—A property owner must apply for the Homestead Exemption before March 1, 1981. To be eligible for the Exemption, a property owner must be 65 years of age during the year of 1981 and own and live on his property. Those previously signed up will be carried over for 1981 automatically.

My office will be open from 8:30 to 4:30 weekdays and from 9:00 to 12:00 on Saturdays (weather permitting) during January and February. You may call at 289-5460.
