To The Citizens of Carlisle:

In regard to your City's issue on becoming a "wet" county, I would like to share my views on why I strongly oppose the use of alcohol. I have many reasons why I oppose the use of alcohol, but here are two reasons that I feel are of utmost importance.

First, alcohol is one of the major causes of death in the United States today. Many automobile accidents are due to the fact that a drunk driver was behind the wheel of an automobile that would cause a terrible wreck on an interstate, highway, street, etc., causing some family or friends to experience a tragedy that they could never forget.

Second, in being a college student, I have witnessed the use of alcohol as a social item. But this often results in the abuse of alcohol in that the consumption of the alcohol at these social gatherings is outrageous. This can cause such problems as people getting in fights, people acting out of order, people unable to remember things they may say or do, etc., because they actually have no control of their actions after such drinking takes place. These actions can lead to the drunk driver on the road when these people leave these social gatherings.

I truly feel there is really no actual purpose in the use of any alcohol as a beverage. I hope my views will help this issue concerning your City.

EASTERN KENTUCKY. HARVEY SLOANE'S FIRST KENTUCKY HOME. 1964-65.

I thought you'd like to see some of my pictures from my old photo album. The snapshots could be better, but to me the memories are what count.

Eastern Kentucky
Fall 1964

That's me back in 1964. (When I first started mining, that is, I am near chopped off my first Eastern Kentucky. You know, was my first Kentucky home. They were the good years for me—and they were the big reason I decided to make Kentucky my lifelong home.

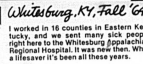

Inez, KY 64

This is where I worked in Eastern Kentucky. It's where Adams's Clothing, Sloane is today—right across from the courthouse. I learned that coal means everything in Eastern Kentucky. And I'll never forget that.

The program I was working on to help identify on known diseases. Naturally, I worked with a lot of coal miners. I learned that coal means everything in Eastern Kentucky. And I'll never forget that.

Whitesburg, KY, Fall '64

I worked in 18 counties in Eastern Kentucky, and we sent many sick people right here to the Whitesburg Episcopalian Regional Hospital. It was one thing. What a lifeaver it's been all these years.

Road 3, Inez, KY, Winter '65

This picture reminds me how important good roads are to Eastern Kentucky. With good roads, sick people can get to the doctor faster, coal can be moved cheaper and our children can get to school safer. The roads are better now, but not good enough yet.

I used to look at old Eastern Kentucky tombstones to find out when people were born and when they died. Today, I realize I care more than ever about the quality of those years in between. That's why I want to be your Governor.

18 years later!

We've all come a long way since then. Here's my family now. On the left is Patrick (6), then Kathy, I'm holding Curtis (3) and Abigail (1). Eastern Kentucky has come a long way, too, from those days of one dollar per county. But there's so much more that needs doing. I'm running for Governor because I want the chance to help again.
