 Some among the dollars that would have to be cut from the Health Services budget due to the state's tight revenue picture.

PAT PATRICK, manager of the Energy Medical Services branch, said the grants are based on separate formulas for personnel and equipment funding applications. "Acceptance of a personnel grant obligates the local government body to match the state money on a 50-50 basis out of the local general fund. In addition the local government must have allocated a minimum of five percent of its general fund to the annual operating cost of the ambulance service," she said. "Equipment grants only carry the requirement of a 50-50 match and expenditure on approved items."

Jones explained that applications for funding received available dollars. "The grants in the personnel area were determined by a formula based upon the population of each operator's service area. The local population figures give each service a percentage of the money we have available to distribute on a statewide basis," she said. "The grants are expected to be transferred by the 1st successful applicants by the end of this month. All funds must be spent or obligated within the current fiscal year."
