Sports In Kentucky

Bowling 'n things.

Here they come! Scouts from the Florida-Citrus, Gator, Hall of Fame, Liberty and Peach Bowls, among others, will be in Lexington this Saturday and it won't be for the fall meet at Keeneland Race Course either.

The University of Kentucky's football team—5-0 for the first time in 24 years—will host LSU (4-0-1) in what looks like a dandy.

UK's growing injury list notwithstanding, this one looks like "all roses" for Coach Jerry Claiborne and Kentucky fans because.

● UK, playing at home, where it is 5-1-1 the last two seasons, gets a crack at a Top 20 team ranked above it in the polls.

● Exposure. A regional television audience will watch two premier revivalist football programs in the south.

● Exposure. It is a recruiting dream for the UKs because everybody loves an underdog turned giant killer and that includes this year's high school senior group, those blue chip players who have not yet decided where to play their college football.

● The television date puts another big check into the UK athletic coffer and moves UK planners a step nearer expanding Commonwealth Stadium, enclosing at least one end zone with *more* seats.

All roses.

Tidbits

UK's 17-13 victory at Mississippi State is the third game in a row the Wildcats have come back to win this season... Receiver Cisco Bryant after catching a 57-yard touchdown pass from Bill Rannell, "He threw it right on the money. I caught it without ever breaking stride." ... Coach Claiborne on Rannell bringing his team from 13-3 behind, "That second half, I tell ya, he's a money player." ... The last time a UK team was 5-0 was 1950 and Coach Paul 'Bear' Bryant's team went on to an 11-1 season and a 13-7 win over Oklahoma in the Sugar Bowl.

Uncle Ed Diddle

A wonderful new book came on the market recently. Called *Coach Diddie ◆ Mister Diddie* Motivator of Men, it is about Uncle Ed Diddle at Western Kentucky University of course.

Written by retired history professor C. Harvey Gardiner (Western '36), who became acquainted with Uncle Ed while he was a student at Western, the book touches on the Diddle family history in Gradyville near Columbia in Adair County and chronicles Ed's travels from there.

Included in the book are testimonies from various of his players from Princeton to Corbin and points in between. It describes the warmth, charm and wit of a colorful man who constructed a state, regional and finally national basketball powerhouse. In 42 years (1922-64) his teams compiled 750-302 record (71.5 percent).

Having spot read it, the book seems a delight. Next week I will offer a bit of a review of *Coach Diddie ◆ Mister Diddie* Motivator of Men.

The book, published by Parthenon Press in Nashville, Tenn., is $15 and available through WKU alumni director Lee Robertson. Five dollars of the purchase price goes to the Western Kentucky University scholarship fund.

Favorites.

UK basketball. Monday was media day and it reminded me of something a sparkly eyed high school star said once soon after signing an NCAA scholarship form with UK.

"It's instant celebrity," he said shaking his head. "All of a sudden people want your autograph. They know who you are, want to know what your favorite color is, your lucky number. It goes on and on."

Favorite UK players. My 10-year-old daughter named her guinea pig Sam, as in Bowie. Her sister has a picture of herself taken with Roger Harden.

And so, this week, basketball media week, who have been your favorite Kentucky basketball players?

GC TO INAUGURATE 22nd PRESIDENT

Georgetown College will inaugurate Dr. W. Morgan Patterson as its 22nd president on Monday, Oct. 22, at 10 a.m. in the John L. Hill Chapel on the campus. The inaugural ceremony will cap a weekend of special events marking the occasion.

Winless Jackets face Bath

Raceland has a good football team and proved it here Friday night, defeating the 0-6 Bluejackets 42-13.

"Good teams capitalize on breaks and have a way of making their own breaks," coach Ben Pumphrey commented.

In the first quarter, the Jackets stopped the Rams on fourth down, but a holding call cost the Jackets the ball and 15 yards. The Rams then fired a strike for a touchdown. In the next possession, a punting situation, Raceland executed a fake punt and passed out of trouble for a score.

The Jackets helped the Rams' by fumbling on the five yard line on a drive of their own.

"Raceland scored one touchdown in the first half that they really earned," Pumphrey said.

The Rams started the second half by covering an on-side kick and drove for a fourth touchdown. "They didn't need any more breaks. They just played mistake-free football," Pumphrey pointed out.

Nicholas had what Pumphrey termed "two beautiful touchdowns on passes to Gary Dotson. The first was a 30 yard bomb streaking down the sideline thrown by Rocky Young. The second was a 75 yard pass and run on a slant pattern thrown by Kevin Wells. The final score was well-earned by the Raceland team."

Offensive stats: Pope, 12 carries, 61 yards; Young, 11 carries, 44 yards, 6 passes, 2 for 73 yards; Wells, 10 carries, 32 yards, passing: 3 for 3, 108 yards; Blakeman, 1 carries, 3 yards; Dotson, 3 receptions, 148 yards; Watkins 1 for 13 yards; Coldiron, 1 for 18 yards; Hardin, 4 punts for 151 yards.

Defensive tackles - Young and Kirby. Ends, 12, Curtsinger and Allison, 11; Anderson and Baker, 7; Watkins, 6; Coldiron, 6; Farah, 5; McGuffey, 5; Dotson, 5; Wells, 4; Pope, 3.

Rsthing yards	113	227
Passing yards	181	137

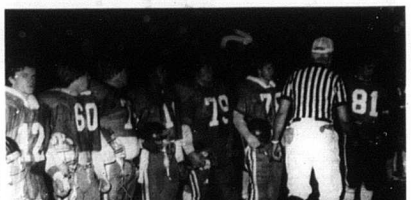
The Jackets still looking for first win take to the road for their final two games of the season. This Friday they meet Bath County, with the football finale Oct. 26 at Frankfort.

Seniors serve as game captains

Nicholas County High School senior football players were honorary captains at Friday's last home game. L-r, Brian Watkins (81), Dewayne Baker (78), Steve Kirby (79), David Allison (76), Jeff Curtsinger (60) and Kevin Wells (12). Senior quarterback Rocky Young (11) is at center field for the coin toss. Senior Darren Robinson is injured and out for the season. The camera catches the seniors front on in the picture below. — Photos submitted



MSU DROPS KANSAS, OPENS WITH OKLAHOMA

The Morehead State basketball team has dropped the University of Kansas from its 1984-85 basketball schedule, which was originally scheduled for Dec. 5 in Lawrence, Kansas.

Eliminating the Kansas date has not made the 1984-85 schedule easier, due to the fact that MSU will now open the season with Oklahoma on Friday, Nov. 23. The Sooners are the defending Big Eight Conference champions and feature the talented Wayman Tisdale.

Win a rifle or a bow

by John Wilson
Dept. Fish & Wildlife

Kentucky deer hunters will have a chance to win either a new rifle or a bow and arrow outfit this year, while helping a wildlife research project at the same time.

Most contests ask that participants return an entry form or a coupon of some kind, but in this case the "coupon" is most unusual — the lower left jawbone of a legally taken deer.

Mailing envelopes are available at all county check stations or from conservation officers. If you get a deer this season, be sure to pick up one of these envelopes and follow the instructions printed on it. The jaws must be removed from the deer, scraped to remove as much flesh as possible then allowed to air dry for at least two days before they are mailed.

A drawing will be held shortly after the Jan. 9 deadline. The winning gun hunter will receive a Winchester Lightweight 270 rifle with a 3x-9x Leupold scope. The name of a bowhunter will be drawn for a Martin Cougar Magnum bow with sights and Easton xx75 camouflage arrows. Winners will be notified by mail.

John Phillips, the wildlife biologist in charge of Kentucky's deer management program, will use the jawbones to gather age-structure data about the state's deer herd. Deer can be aged accurately by examining their teeth.

The end result of examining thousands of jaws will be a computer model of each county's deer herd, showing the extent of recruitment of young deer into the population, giving a good indication of hunting pressure, and providing other valuable information about Kentucky's growing deer herd.

Since the Department of Fish and Wildlife does not have the manpower to conduct biological check stations in each county, having hunters mail in the jawbones from their deer will give researchers much needed information.

It is expected that a similar drawing will become a regular part of Kentucky's deer season if this pilot program proves successful.

So when you dress out your deer, don't forget to save the jawbone. And if you want to have your trophy mounted, just tell the taxidermist to save the jaw for you. Deer heads are mounted over a form and no part of the skull is used, so removing the jaw will not affect the mount. But unless you know what you're doing, you'd better have the taxidermist do this for you, since you could ruin the skin if you try it on your own.

Flu vaccines available Wednesdays at WEDCO

Flu infections can be very mild. However, some people who get the flu will also get pneumonia or other serious complications.

The Nicholas County Health Department and Home Health Unit of the WEDCO District Health Department, now have a limited amount of flu vaccine on hand. The vaccine will be provided on a first-come, first-serve basis with priority given to those who have chronic illness, or who are 60 years or older.

The vaccine is available on Wednesdays only until the supply runs out. Cost is $4 on a sliding fee scale.

Persons who are unsure about whether or not to request the vaccine should consult with their private physician.

Eye Openers

By Dr. Robert F. Pretzsch, Optometrist

Here are some TRUE-FALSE statements on sharpness of vision.

"20/20 vision means perfect vision". (FALSE.) 20/20 vision means only that you can see at 20 feet what you should normally see at that distance. If your vision is above normal, the second number is lower. For instance, you might have 20/15 vision.

"15/15 vision is better than 20/20 vision". (FALSE.) 15/15 vision means the same as 20/20 vision, except that you have normal sharpness of sight at 15 feet. The 20/20 figure is used as a standard to describe sharpness of vision regardless of the testing distance.

"Clearness of vision varies with distance." (TRUE.) You may see normally at 20 feet, but less than normally at reading distance. The usual cause of this condition is hyperopia or farsightedness. Or, you may not see normally at 20 feet, but see at normal levels close-up. This is usually caused by myopia or nearsightedness.

In most cases, sharpness of vision that is subnormal can be improved by eyeglasses or contact lenses.
