Fire-ravaged motor home

Fire destroyed this 1978 Chevrolet motor home belonging to Mr. and Mrs. Kendall Roger of Balls, Tenn., on Sept. 8 as reported in last week's Mercury. The blaze started under the hood of the vehicle on U.S. 60, some five miles north of Carlisle, and spread throughout the interior. The handicapped, enroute to Canada after an overnight stop at Blue Lick State Park, lost all their belongings and money in the fire, which local firefighters were called to extinguish.

Eye Openers
By Dr. Robert F. Pretzsch, Optometrist

Do eyes wear out with aging? No, not healthy eyes. If the eyes are properly corrected for their vision problems, they can serve efficiently for a lifetime!

Eighty percent of the process of learning relies upon eyesight. Children with vision problems may have difficulty learning. But they probably don't recognize their problems, so they can't tell their parents about it.

Of every 20 persons in the United States, one has serious vision problems which can't be totally corrected. And of the latter number, 15 percent are unable to see well enough to read newspapers. But modern vision experts can help many of these low vision persons to see better through the use of highly sophisticated optical devices.

A common explanation given by drivers involved in motor accidents begins with "I didn't see..." Conclusion? Vision is the one human sense which is absolutely essential for safe driving. Do you see?
