## Health Tips from Lee Rose

### Fears

All of us have fears and usually the best way to deal with them is to look at the fears realistically and talk about them. This is often hard to do with children because they have not developed the ability to talk about their fears so they act their fears out.

In the early years children must learn to cope with a wide range of feelings, some good such as joy and pleasure, some not so good such as anger, frustration or fear.

Certain fears are more likely to occur at specific ages. Younger children in the toddler years are more likely to fear specific things such as strangers, noises, objects or what might happen to them like getting hurt, or being flushed down the toilet drain.

Children who are five to six years old fear more imaginary things such as monsters, the dark, being alone, or death. Adolescents from 12 to 18 years are more likely to fear loss of independence, illness or death, and adults may fear animals, heights, intimacy and commitment, illness and death.

It is more understandable to think about fears according to a child's age and their life experiences. Children will express most of their fears. Some of their fears are helpful like the fear of fast moving cars and others are not, like the fear of going down the bathtub drain.

Parents can be very helpful in teaching a child to deal with fears, but to do this the parent must first know that a child's fears are as real as the parents' fears. It is helpful to sympathetically and gently help a child to understand their fears while helping them also to confront their fears.

For example, a small child can be helped to see that he or she is too big to go down the bathtub drain. Or if a small child is afraid of a dog the parent can hold the child in his or her arms a distance from the dog and talk to the child about the dog, advancing toward the dog as the child permits.

Helping children to face their fears will help when they reach adolescence and adulthood to face their fears rather than repress them. It is never helpful to tease, ridicule or force a child to deal with his or her fears. This type of behavior on parents part may have bad effects on the child not only now but when the child grows up, he or she may have difficulty facing fears.

and a restaurant where all needed refreshments may be had.

The cottages, 70 in number (more will be built if orders are received) are frame buildings, with shingle roof and floor of dressed plank. Most of them have two rooms, the bedrooms have two bunks with straw.

An ice-house full of good ice, a large cistern and an engine at the foot of the hill throwing water into the tanks on the ground insure plenty of pure cold water without money and without price.

A ladies room, well appointed, is conveniently located.

A large stable, with conveniences for feeding and pasturage, completes the material appointments. Horses kept at $1 per day; plan 50 cents for single feed and 25 cents for hay, pasturage in the neighborhood of 10 cents per day.

**Expenses** — The K.C.R.R. will sell round trip tickets at four cents per mile. Admissions to grounds, 10 cents; cottages of two rooms for whole meeting $12; cottages of one room, $8. These prices include straw for double bunks. Rent for four chairs, bucket, etc., $1; meals at dining hall per day, $2; single meals and single lodging, 50 cents. For reservations please contact T.A. Dorsey, Esq., Carlisle, Kentucky.

The happenings at Deering Camp Ground were reported daily by a correspondent to the Cincinnati Commercial newspaper. Review of the clippings supplied to the writer by the Poynter family records many interesting observations.

The correspondent recorded:

"August 11. Yesterday it rained and cooled the atmosphere. It was hot even in the high places. Not everyone attending listened attentively. Some were present for seeing and being seen. Some roamed the grounds or sat in the shade or held love feasts in the carriages, for there were doubtless many more couples interested in each other than all the world outside. It will be a long time before the mere pleasure seeker will be absent from this and all similar places.

"August 12. Monday among preachers is a "blue day" — a day in which they lounge about the house and stroll about town. They have the conceit that having done such immense work on Sunday, they are entitled to a day of indolence. It is generally the case that the feebler the sermon, the more the preacher insists upon absolute repose. Monday at the camp is also a "blue day," and therefore jaded audiences. Monday is followed with small crowds. The consequence is a wearisome day."

**THESE** interesting observations given the human side but the accomplishments of the camp were great. Many conversions and baptisms took place. The spirit of God was in great force. Many persons were reached with over 6,000 in attendance in the closing days.

Experiences of the distant past can be forgotten but should be remembered for the inspiration of the present. This light from the past can spotlight a worthwhile event or should illuminate a way of life that is important in remembering our roots.
