Eye Openers

By Dr. Robert F. Pretzsch, Optometrist

Inserting Contact Lenses

Q. Can a soft contact lens be placed in your eye "inside out"?

A. Yes. This accidental insertion can be avoided if you first check the edges of your lenses to be sure they continue straight up. If they turn out, you're going to put them in your eyes inside out. Should this happen, these signs should alert you that something is amiss:

1. Your lenses will be less comfortable than usual.
2. They may tend to fold on your eyes.
3. Your lens may move a lot when you blink.

Take them out and start all over again.

Q. Can an elderly person wear soft contact lenses?

A. Yes, unless one's hands are particularly shaky. There should be no problem putting them in and taking them out. More older patients are opting for contact lenses than ever before, since it has been found that they provide superior vision for post-cataract patients. With careful instructions, a patient of any age can learn to insert and remove contact lenses.
