CAPITAL GAINS HOLDING PERIOD SHORTENED

More people are now able to benefit from long-term capital gains treatment of profits from sales of assets, due to a recent change in the law. The change affects assets purchased after June 22, 1984 and before 1988, the IRS said.

If these assets are held for more than six months before sale, only 40 percent of the profit would be taxed, or 50 percent of the loss would be deductible. Assets purchased before this date must be held for more than one year to be eligible for this favorable treatment.

For more information on capital gains get the free IRS Publication 504, "Sales and Other Dispositions of Assets." It is also available as reference for reading or photocopying in many public libraries.
