LETTERS FROM SANTA

Dear Santa,
My name is Ryan Colby Hunter and I am three years old. I have been a good boy this year, (especially lately) since I know you will be coming soon.
For Christmas I want a bunch of toys but not all of them. I have a little brother, Adam who is 19 months old. He is pretty good if he would stay out of things. But please don't forget him. He would like a big wheel like mine.
I will leave you some Ale-8 and cookies under the tree. Please don't forget to stop at my new house because hopefully we will be in it.
Love,
Ryan Colby & Adam Hunter

Trooper Tim Thomas (left) and Jim Dolwick of the Kentucky State Police spoke to the eighth grade classes at Nicholas County Elementary School last week about the dangers of drug abuse. USDA announces program

Recently enacted farm legislation authorizes USDA's Agricultural Stabilization and Conservation Service (ASCS) to compensate eligible producers in disaster-affected counties for losses of 1986 crops caused by drought, excessive heat, floods, hail, or excessive moisture.

Gary Partin, CED, of the Nicholas County ASCS office, said the 1986 disaster payment program will provide generic commodity certificate payments on program and non-program crops.

For this disaster program, the program crops are defined in the Disaster Act as wheat, corn, grain sorghum, barley, oats, upland cotton, rice, peanuts, soybeans, sugarcane, and sugar beets. Nonprogram crops are defined as tobacco, extra long staple cotton and commercial crops.

Eligible counties are those counties in which producers are eligible to receive FmHA emergency disaster loans for crop losses in 1986 caused by the above natural disasters.

For nonprogram crops, the county must have been designated on or after July 1, 1986. Partin said FmHA loans are available in the county, therefore Nicholas County producers are eligible to apply for the program.

Eligible producers who apply for the disaster payment program must furnish ASCS with acreage and crop production reports so that eligibility can be established.

To qualify for disaster payments on wheat, corn, grain sorghum, barley, and oats farmers must have participated in the 1986 acreage reduction program for the crop.

For the other crops, the acreage for disaster payments is limited to the 1985 acreage of the crop and will be based on the nonprogram if the producer did not participate in the 1986 acreage reduction program.

The payment rate is the county loan rate for the crop, or an average market price for crops without a loan rate. Payments will be limited to $100,000 for program and non-program crops.

Producers are encouraged to organize their production data as quickly as possible so that they will have the necessary information when they apply for the disaster payment program. The final date for filing disaster payment applications is January 30, 1987.

Program applications are not on a first-come, first-served basis.

Additional details of the 1986 disaster program may be obtained from the ASCS office at 368 East Main Street across from the IGA.

Burley down

Kentucky burley tobacco production for 1986 is expected to total 297.3 million pounds, 25 percent below last year and 40 percent lower than 1984's crop.

The Kentucky Agricultural Statistics Service said a 10 percent cut in the effective quota and considerable carryover reduced acreage set. Dry conditions in many sections of the State this summer lowered yields.

Harvested acreage fell 13 percent to 143,000 and yield is expected to average 2,090 pounds per acre compared to 2,300 in 1985.

The 1986 growing season in Kentucky was fair. Transplanting progressed slowly because of irregular plant size and wet conditions in some areas. Dry conditions moved into the State early in the summer causing some acreage to bloom too early and generally reducing plant growth. In contrast, some areas received adequate rain and produced excellent crops.

Production for the eight-State Burley Belt is estimated at 434.9 million pounds, 24 percent below last year. Yields for the Belt are expected to average 1,964 pounds per acre compared to 2,247 pounds in 1985.

Kentucky accounts for 68 percent of total Belt production.

Sign-ups scheduled

ASCS will accept applications for the regular ACP cost-sharing practices until January 31, 1987.

All spring seeded practices are included in this signup period.

Persons interested in applying should take their soil samples now and take them to the county agent.

ASCS will accept applications for the ACP Long Term Agreement contracts until January 23, 1987.

Producers interested in these contracts should contact ASCS at as soon as possible.
