Eye Openers
By Dr. Robert F. Pretzsch
SIMPLE SEEING TIPS FOR SENIORS
Nature changes our eyes, and the way we see, from the time we are born. Some of the biggest changes occur when we become senior citizens.
Regular eye examinations enable your optometrist to detect these changes before they make seeing uncomfortable. A change of prescription can often make your vision clear again, unless it is being altered by certain eye diseases.
These tips can help you see better:
• Use higher wattage bulbs at home or in your office.
• Move your source of light closer to print or small objects without letting it shine in your eyes.
• Clean your glasses more often with a mild soap and water; wipe dry with a soft tissue or cloth.
• Carry a small flashlight for use in low lighted areas.
• If you drive, keep windshield and headlights clean, just when you fire, if it is becoming more difficult to see at dusk or at night, reevaluate — in consultation with your optometrist — whether or not you should continue to drive at night.

Nicholas showcased on tv series

Continued from page 1
Nicholas County Chamber of Commerce members that the goal of Kentucky Life is a simple one.
He said, "We just want to paint a positive portrait that will cause Nicholas Counties to feel a special pride in the place they call home."
He added that "we also don't mind at all if, after seeing the program, viewers in other counties say, 'Gee, I think I'd like to see there.'
Crawford, a native of Carlisle who now lives on Burris Road in Nicholas County, is also executive producer of the series.
