Kentucky Afield

by Norm Minch

An intensive study of crappie populations will be conducted over the next few years at 10 major lakes in the state, according to Jim Axon, assistant director of the Department of Fish and Wildlife Resources' fisheries division.

Trap netting to sample crappie populations will continue from late October through early November at Cove Run, Grayson, Dewey, Carr Fork, Barren River, Taylorsville, Green River, Kentucky, Barkley and Rough River lakes to assess what management, if any, might be needed to improve the crappie fishery at these impoundments.

The study will provide data on the abundance of crappie, their size structure, age structure and growth, and other factors. The study will help determine if any of these lakes might have insufficient forage for crappie, or are being overharvested.

One reason for the study, according to Axon, is that although numbers of crappie taken may be normal, there has possibly been a gradual reduction in the average size fish taken from certain lakes over the last several years. Poor growth and recruitment (numbers of smaller fish reaching harvestable size to replace those which are taken or die naturally) will be two other specific areas examined during the study.

Approximately 1,000 crappie will be tagged at Cave Run, Barren River, Dewey, Rough River and Barkley by the spring of next year to check the percentage of harvest from these lakes to complete the tagging process. Five lakes are about as many that can be efficiently tagged at any one time to collect accurate information.

Fishermen will be paid $5 each for returning tags from crappie taken during the year at these reservoirs. At the end of the year, a drawing will be held from the names of those anglers who turned in tags and $1,000 awarded to the winner of the drawing.

Envelopes to mail in collected tags should be available near the lakes, however, tags can be sent in any envelope to the Department of Fish and Wildlife Resources, Division of Fisheries, No. 1 Game Farm Road, Frankfort, Ky. 40601.

Turkey Day Give-A-Way Winners!

● Christine Booth
360 W. Main St., Carlisle

● Kathleen Mattox

CITY OF CARLISLE, KENTUCKY
NOTES TO FINANCIAL STATEMENTS, Continued
For the years ended June 30, 1986 and 1985

Construction Maintenance Fund: Seventy percent of the remaining revenues shall be used to pay into the fund the proper cost of operating, maintaining and insuring the Utility System (Water Sewer and Gas). Payments in excess of current operating costs need not be made into this account after accumulation of six months' normal requirements, but any funds thus extracted for Sinking Fund Reserve or for Depreciation Reserve until fully restored if reserves are accumulated.

Depreciation Reserve (Fund): Four hundred dollars ($400.00) per month (beginning with the revenues which next be set aside into this fund and shall be used to set up reasonable reserves for renewals, replacements, new construction and contingencies in the operation of the Utility System (water, sewer and Gas). Payments need not be made into this account after accumulation of a total amount of $10,000 balance.

The balance of the Depreciation Fund at June 30, 1986 and 1985 was $13,343 and $12,713, respectively.

Surplus Revenues: After all funds have been accumulated to the maximum requirements under paragraphs a through e above, and there is a balance in the Revenue Fund in excess of three months' estimated future requirements, such excess may be used (1) to retire or redeem bonds in advance of maturity, (2) to make extensions and improvements to the combined system, or (3) for any lawful purpose.

Changes in working capital

The changes in the components of working capital for the water, Sewer and Gas Utility Fund consist of increases (decreases) as follows:

	1986	1985
Current assets:		
Cash and savings account	$157,799	$150,706
Accounts receivable	15,513	15,947
Restricted assets	15,513	15,947
Increase in current assets	174,401	182,653
Current liabilities:		
Accounts payable	(14,458)	7,578
Accrued liabilities	(83)	1,000
Utility security deposits	14,383	111,875
Revenue bonds	(5,280)	57,687
Bonds payable	(5,280)	(5,000)
Customer overpayments payable	(563)	(648)
Increase(decrease) in current liabilities	(1,881)	67,265
Increase in working capital	$172,512	$115,388

ACCOUNTANTS' REPORT ON INTERNAL ACCOUNTING CONTROLS

We have examined the general purpose financial statements of the City of Carlisle, Kentucky, for the year ended June 30, 1986, and have issued our report thereon dated August 5, 1986. As part of our examination, we made a study and evaluation of the City's system of internal accounting control to the extent we considered necessary to evaluate the system as required by generally accepted auditing standards and the standards for Audit of Governmental Organizations, Programs, Activities and Functions, issued by the U. S. General Accounting Office, the Single Audit Act of 1984 and the provisions of OMB Circular A-128, Audits of State and Local Governments, and accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The Mayor and City Council and City Officials (Management) of the City of Carlisle, Kentucky are responsible for the City's compliance with laws and regulations. In connection with our examination referred to above, we selected and tested transactions and records from normalor federal financial assistance programs to determine the City's compliance with laws and regulations. Non-compliance with which could have a material effect on the allowability of program expenditures.

The results of our tests indicate that for the transactions and records tested, the City of Carlisle, Kentucky complied with the laws and regulations referred to above. Our testing was more limited than would be necessary to express an opinion on whether the City of Carlisle, Kentucky administered those programs in compliance to all material respects with laws and regulations noncompliance with which would have a material effect on the allowability of program expenditures; however, with respect to the transactions that were not tested by us, nothing has come to our attention to indicate that the City of Carlisle, Kentucky has violated laws and regulations other than those tested by us for which we noted violations in our testing referred to above.

June 30, 1986

I. Review of Internal Control

We tested all major systems of internal accounting control for the City of Carlisle, Kentucky to be adequate when considering the size of the accounting staff. Because of the limited personnel available to perform accounting functions, the ideal segregation of duties is not practical for the City of Carlisle, Kentucky.

II. Compliance

Our testing for compliance matters, in accordance with Single Audit Act extended to all active grants of the City of Carlisle for the year ended June 30, 1986. The Revenue Sharing Grant Fund (CFDA # 21.300) was the only active federal grant for the year ended June 30, 1986.

ACCOUNTANTS' REPORT ON COMPLIANCE

We have examined the general purpose financial statements of the City of Carlisle, Kentucky, as of and for the year ended June 30, 1986, and have issued our report thereon dated August 5, 1986. Our examination was made in accordance with generally accepted auditing standards and the standards for financial and compliance audits contained in the Standards for Audit of Governmental Organizations, Programs, Activities and Functions, issued by the U. S. General Accounting Office, the Single Audit Act of 1984 and the provisions of OMB Circular A-128, Audits of State and Local Governments, and accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The Mayor and City Council and City Officials (Management) of the City of Carlisle, Kentucky are responsible for the City's compliance with laws and regulations. In connection with our examination referred to above, we selected and tested transactions and records from normalor federal financial assistance programs to determine the City's compliance with laws and regulations. Non-compliance with which could have a material effect on the allowability of program expenditures.

The results of our tests indicate that for the transactions and records tested, the City of Carlisle, Kentucky complied with the laws and regulations referred to above. Our testing was more limited than would be necessary to express an opinion on whether the City of Carlisle, Kentucky administered those programs in compliance to all material respects with laws and regulations noncompliance with which would have a material effect on the allowability of program expenditures; however, with respect to the transactions that were not tested by us, nothing has come to our attention to indicate that the City of Carlisle, Kentucky has violated laws and regulations other than those tested by us for which we noted violations in our testing referred to above.

AGRI-NEWS

Harvest ends year on soggy note

Farmers across Kentucky are looking for a drying out period to conclude their crop harvests for 1986. November has been a very rainy month, with wet fields limiting fieldwork to an average of 1.9 days per week. In some areas of the Commonwealth, little or no fieldwork has been accomplished this month.

Soil moisture for the state was rated 45 percent short, 71 percent adequate and 24 percent surplus by reporters for the Kentucky Agricultural Statistics Service.

"While the rainfall has been a hindrance to farmers trying to get in the last 6 of their grain crops, the rain is much-needed to help the subsoil moisture for next year's crops," said Agriculture Commissioner David E. Boswell.

"In many cases, harvest is equal to or ahead of last year at this time. The rain has caused delays, but it's been beneficial."

Most tobacco warehouses are receiving good quality tobacco for the sales which open November 24.

Buyers are generally pleased with this year's crop, but have expressed concern over the dryness of the 1986 leaf on the floor and a few cases of immature leaf, according to reporters for the statistics service.

Fifty-three percent of the 1986 burley crop has been stripped. This compares to 55 percent at this time a year ago and 42 percent for the five-year average.

Nearly all the corn for grain in West and West Central Kentucky has been harvested. Some fields in Central and Eastern Kentucky must still be harvested.

The harvest is 93 percent complete, despite being limited by wet field conditions. This compares with 84 percent of the harvest completed a year ago and 87 percent for the five-year average.

About 70 percent of the soybean acreage is harvested. This compares with 60 percent at this time last year and 68 percent for the five-year average.

The killing freeze on November 12 ended growth and should enhance the drying out of late beans. Some farmers are having problems with soybeans "popping out" during harvest, according to the statistics service's reporters.

The sorghum for grain harvest is nearly 90 percent complete.

Fall wheat seeding is 88 percent complete, considerably ahead of the 75 percent seeded at this time last year and the 78 percent for the five-year average.

Most early seeded wheat has emerged to a satisfactory stand, according to the statistics service.

The emerged wheat conditions is rated as 2 percent poor, 12 percent fair, 74 percent good and 12 percent excellent.

Pastures are in fair to excellent condition because of the additional rainfall. Recent temperatures in the teens have moved the grasses toward dormancy; but if temperatures warm, there will be limited additional pasture growth.

Fleming resident

Tree farmer honored

By Robert Bauer
Service Forester

Christopher Muse of Wallingford, Kentucky, was recently named the Northeastern District winner of the Tom Wallace Farm Forestry Contest. Muse was chosen by the Morehead office of the Kentucky Division of Forestry for his continued efforts in effectively managing his woodlands.

The contest, co-sponsored by the Courier-Journal and Louisville Times, is open to all Kentucky landowners who manage their timberlands.

Each nominee was judged on eight aspects of forest management, tree planting, harvesting, management, erosion control, fire protection, management promotion, wildlife and recreation. Each District winner will compete for awards totaling $1,000.00

Muse has been practicing good forest management on his Fleming County Tree Farm, which is jointly owned with his mother, Mrs. Hildreth McKenzie of Flemingsburg.

Some of his Tree Farm accomplishments include 66 acres of woodland thinning, 10 acres of site preparation for natural regeneration, 14 acres of white pine pruning and over 35,000 trees planted. In addition to this, the woodland has produced 71,000 board feet of sawlogs, 4,000 pine posts and poles plus 100 cords of firewood over the past four years. This forestry work has resulted in 3½ miles of roads being built and maintained for fire protection, management access and recreation purposes.

Muse has also become involved with forestry work on additional federal and privately owned forest lands by forming a forestry vending service. Through C & D Forestry, Muse and partner, Dave Clark, have completed forest management work for local landowners and Forest Service contracts which include tree planting, woodland improvement and natural regeneration practices covering more than 400 acres.

By managing this nation's primary renewable resource, Muse is setting an example for all Kentucky landowners.

Technical forestry assistance is free through the Kentucky Division of Forestry in Morehead. Write to 748 West First Street, Morehead, Kentucky 40351; or call (606) 784-7504 for more information.

(Left to right) Roger Whirler, 10 years old, and grandfather James Whirler, in their first year of deer hunting, bagged this 8 point buck, November 9, on the Allen Whaley farm in Scott County. Photo submitted.

November report issued

Production forecasts for the State's corn, soybean and tobacco crops are holding steady at last month's levels, while harvest progresses rapidly.

The November 1 Crop Report indicates corn yield at 88 bushels per acre, soybeans at 30 bushels and burley tobacco at 2,000 pounds. Corn harvest is 91 percent complete as State Statistician Bill Wilson and Agriculture Statistician Jim Johnson have completed their surveys. Soybean harvest is 63 percent complete, ahead of both last year and normal.

Tobacco stripping progress is ahead of normal and an adequate supply is expected when markets open November 24.

Kentucky's corn for grain production is forecast at 138.2 million bushels, down 13 percent from last year's record high.

The average yield of 88 bushels compares to 102 bushels last year. Individual farm yields have been variable, from disappointing to very good.

For the Nation, corn grain production is expected to total 8.27 billion bushels, down 7 percent from 1985.

Mercury Magic Means Fun

Robey Winner

Glenn Robey of Waddy, KY was the winner of the Lowe 14 foot boat given away by the Telephone Pioneers. The drawing was held November 1 at the Galt House in Louisville.

Office Closed

The Nicholas County Clerk's Office will be closed Thursday, November 27, 1986 (Thanksgiving Day) and Friday, November 28, 1986. This closing is due to the computer system being down for the licensing of motor vehicles.

We will be open on Saturday morning from 8:00 A.M. to 12:00 Noon.

Rose Scott, Clerk

Thanksgiving

Let us give Thanks for the Blessings we sometimes take for granted, for God has richly blessed each of us.

May your Thanksgiving be Happy!
