Hall keeps clipping for 18 years . . .

By Marsha Mattox of the Carlisle Mercury Staff
During 18 years of clipping for himself, Jimmie Hall has taken 100,000 newspaper clippings.

recess for taking a few vacation days.
Hall's Barber Shop is located on the corner of Main and Locust Streets, below Fifthmaner Road. It has been in business since the fall of 1962.

"I think it takes longer now to get a barber's license. Like when I was a kid, you could get a license in a week."

Livestock prices mostly higher

Livestock prices received by Kentucky farmers at mid-July were mostly higher than the June averages, which were mostly steady to mostly lower, said Agriculture Commissioner Dewey C. Borewell.

Jimmie Hall

Calf prices at mid-July led the way at \$77.70, 85 higher than the June average of \$72.70 and \$22.50 higher than the July 1986 average of \$55.20.

All beef cattle, with a mid-July price of \$17.10 were \$1.18 above the June average of \$15.92 and \$11 above a year ago. The increase from June was due to a \$2.20 increase in mid-month and higher prices at mid-month, as cow prices declined 70 cents.

Hog prices were up 80 cents at mid-July to \$60.60 from the June average of \$59.80. This reflects an 80-cent increase in barrow and gilt prices.

Crown prices were down at mid-July from their June average, but rose compared to a year ago, according to the Kentucky Agricultural Statistics Service.

Wheat prices, with a mid-July price of \$2.45, were unchanged from the June average, but 1 cent higher than July 1986. Soybeans, with a mid-July price of \$10, were down 13 cents from the June average of \$11.30. Corn prices averaged \$1.50 at mid-July, 12 cents below the June average of \$1.62 and 44 cents below a year ago.

1984 graduate of Nicholas County High School, the native Nicholas County resident Randy Barber College in London for six months.

He is employed by McAlpin's in Lexington, Ky.

After moving back to Carlisle in 1969, Hall ventured into business on his own, opening Hall's Barber Shop on the corner of Main and Broadway in the old C. C. Colburn building.

During his 18 years of business, Hall operated his shop alone, until the early 1980s.

Curly McDaniel's Plumbing Company worked part-time for Hall, as did Tom Boone of Mason County, and Mark Fosse.

Barbering and and off since 1962, the Supervisor of Montgomery County began working for Hall in 1981, and a still with him.

Spencer also doubles as a part-time barber at his shop on a state street.

Open Monday, Tuesday, Thursday and Friday, 8 a.m. to 5 p.m., and 8 a.m. to noon on Saturday.

Hall or Spencer, usually both, are in to cater to customers.

"Somebody has to be here," Hall said.

"If the doors are locked and no one is here during those hours, some will come back, but some won't."

"Barbering is a way to make a living, but you won't make a lot of money," he concluded.

Dewey C. Borewell, Paris automobile agency, was recently honored by receiving a 1986 Five-Star Award by the Service Professionals for the firm's finest work in service customers satisfaction during 1986.

He is employed by McAlpin's in Lexington, Ky. Barbering and and off since 1962, the Supervisor of Montgomery County began working for Hall in 1981, and a still with him.

COMMUNITY SPOTLIGHT

Farmland conditions a concern to Edgar Darrell

By Marsha Mattox of the Carlisle Mercury Staff
Included in the advertisement is a car dealership and buy one.

"This knowledge is available free of charge for those who want to discuss soil conservation, or need assistance with conservation and land management," Darrell said of Chapin.

"I can help anyone with building a house in a subdivision, or getting a field ready for a crop," Chapin said.

"I can help anyone who moves a farmer evaluate the potential of the soil and the management needed for maximum food and fiber production."

He can assist community officials, engineers, developers, builders and some those in planning land use, selecting sites for construction and identifying special practices needed to insure proper performance.

Specialists in recreation, wildlife management, waste disposal and pollution control can use Chapin's knowledge to help them understand, protect and enhance the environment.

Great differences in soil properties can occur within short distances. Some soils are naturally wet.

Some are shallow to bedrock. Some are too unstable to be used as a foundation for buildings.

Clayey or wet soils are poorly suited to use as a riprap bank or as a foundation for buildings.

A high water table makes an unproductive installation. Chapin can help give understanding of these and many other soil properties that affect land use.

"People hire technicians to do work 10 times of charge," Darrell said.

"I have at least one person a week who asks how much they owe me," Chapin added.

Chapin has assistance with his responsibilities as district conservationist.

Ron Allison, a 1987 graduate of Nicholas County High School, is a district conservation technician for the district.

Donna Galbreath has served a district clerk for Nicholas County Conservation District since fall, 1985.

In addition, the district sponsors Soil Stewardship Week, making the minister from each church in Carlisle to give a sermon on soil stewardship, or talking one of what has been estimated to be from God," Darrell said.

There is little difference between a good steward and a good conservationist," he added.

According to Darrell, through the Equipment Revolving Fund program, loans are made to citizens needing a piece of conservation equipment, but are unable to pay for it.
