CITY OF CARLISLE EARLY FLOODPLAIN NOTICE

The City of Carlisle is considering the upgrade and expansion of its sanitary sewer system as a Small Cities CDBG project. The project consists of: (1) the rehabilitation of the existing sanitary sewer system for the purpose of reducing inflow/infiltration and 2) upgrading the existing municipal sewage treatment plant to meet final effluent limits and expanding the 200,000 gallons per day sewage treatment to a new and higher rated design capacity of 350,000 gallons per day. The project is, however, located in the 100 year floodplain. And although this requires special consideration, it will nevertheless be necessary to carry out the project in the floodplain in order to meet the present and future needs of the city. The city is interested in discussing alternatives to the project and securing public perceptions of adverse impacts that could result from the project and possible minimization measures. Please send written comments to Lee. G. Bentz, Mayor, City Hall, Carlisle, Kentucky 40311. Comments will be received until August 15, 1987.
