Blood drive set March 23

Springtime in Kentucky brings flowering trees, blue skies, and warmer temperatures.

A case of spring fever may give us that "good-to-be-alive" feeling.

The Nicholas County Donor Group and Central Kentucky Blood Center ask you to share your good feeling by donating blood Monday, March 23 from 12:00 to 5 p.m. at the First United Methodist Church.

In an average day, 170 units of blood and specialized components are transfused in CKBC'S service area.

Regularly scheduled blood drives are essential for effective management of blood and specialized components in CKBC's 46-county service area.

Red cells, the component most frequently needed can be stored for only 21 days. Platelets, another component regularly needed, must be transfused within seven days of donation.

Blood drives like the ones sponsored by the Nicholas County Donor Group help provide a steady blood supply to patients in local hospitals.

With the group's support, CKBC strives to maintain an inventory of 1,400 units of blood and blood components.

Do your part at the spring blood drive Monday, March 23. Call Barbara Hopkins at 289-2021 for more information.

Potluck set

The P. O. F. F. Club of the First Baptist Church will have their regular monthly potluck supper March 24, 6:30 p.m. in Fellowship Hall. People over fifty five are encouraged to participate in this Christian Fellowship Club.

Beautiful: Tips from the Hart

Dear Hart,

Any beautiful tips to help harden soft nails? Gelatin? Tina

Dear Tina,

Forget the old wive's tales about gelatin. It's the protein in your diet that makes your nails strong and healthy. Is your diet good?

There is a good inexpensive, nail hardener at your pharmacy, white iodine. It can prevent flaking and peeling. Put the iodine on your nails every night for one week, then once a week or less often just to keep the hardness you want. You don't want to do it too often because it may make your nails too hard and brittle. Nails need to be a bit flexible. Don't let your nails come into contact with peroxide, they cold turn orange.

Some other tips are, moisturizing them with glycerin, cream, lotion, petroleum jelly, or oil. There are nail hardeners available at cosmetic counters but, be careful, a lot of them have formaldehyde, a chemical that can cause adverse reactions. If you have any of these products, try using it on one nail only for a week to test for problems.

Dear Hart,

How can I make full thick lips look smaller? Full Lips.

Dear Full Lips,

Thick lips are always "in" fashion.

but you can make them look smaller by applying a foundation over both lips, and then with a pencil one shade darker than the lip color, draw an outline just inside your natural lipline. Powder your lips and put color only in the drawn area.

Model Tip: Attention all ladies who wear glasses. If you are farsighted, your lenses will make your eyes appear larger and your make up more prominent, so you will want to use softer colors. If you are nearsighted, your glasses will make your eyes look smaller. Go for bright and bold.

Mind: Daily washing will not cause your scalp's oil glands to work overtime; washing with too harsh shampoos that strip the hair of natural oil, will. Your scalp is forced to overcompensate.

Please send questions to Beautiful: Tips from the Hart, P. O. Box 72297, Louisville, KY 40272.

The Caring Corner

"In the world you have tribulation; but be of good cheer, I have overcome the world" John 16:33

In the mid-sixteenth century, a group of fifty Spanish nuns, led by Theresa of Avila, traveled on foot to a neighboring convent in a violent storm. Crossing a dangerously rickety bridge over a swollen stream, St Theresa prayed that the bridge would hold up until they could safely on the other side. It didn't. When they reached the middle, it collapsed, spilling all of them into the water. After reaching the shore, Theresa raised her eyes to heaven and said to God, "If this the way you treat your friends, it is no wonder that you have so many enemies."

St. Theresa was speaking for many people. Often rickety bridges collapse in our lives, spilling us into anger, resentment and despondency.

The writer of John reminds us to be of good cheer for in the resurrection of Jesus, the world is overcome. Bad times and problems still occur but the resurrection puts them into perspective.

Lens Coatings
"Q. Will coating thick lenses make them appear thinner?
A. Today there are many kinds of coatings. Edge coating covers the thicker outer edge or rim of lenses of very nearsighted people, making less obvious the refractive rings that reveal the power of the lens. These coatings can be made to match the color of the frame. Once applied to the lenses, the coating lasts indefinitely.
Anti-reflective coating reduces the images of lights and those projected from the lenses themselves which sometimes can be irritating to sensitive eyes.
Color coating tints lenses with a variety of colors for purely cosmetic reasons or, in some instances, to lessen the obviousness of a thick lens.
Metallic coatings are used to reduce light transmission to a degree that makes this lens popular with drivers, skiers, hunters and many other sportsmen or patients who work outdoors. Metallic coatings were originally developed during World War II to reduce light interference for pilots.
