Eye Openers
By Dr. Robert F. Pretzsch, Optometrist

EYEGLASSES FOR CONTACT LENS WEARERS

Not everyone can or should wear contact lenses exclusively during an entire day. Environmental and job-related factors often dictate that some contact lens wearers use supplementary eyeglasses to assure clear and comfortable vision at certain times.

SUNGLASSES provide protection and comfort when spending time on the beach or aboard a boat. They reduce glare and brightness and make driving on a sunny day a comfortable experience.

READING GLASSES are a must for those contact lens wearers who only see distances clearly with their contact lenses.

SAFETY GLASSES should be worn over or in place of contact lenses if you work with machinery that creates dust or throws off specks of debris. They are also indicated for some sports such as racquetball, basketball and underwater swimming.

And, every contact lens wearer should have a pair of glasses with their newest prescription for that infamous day when they lose or tear a contact lens.
