health hints

1 Learn to "bust off" self-defeating or negative self-talk. Many self-talkers feel that unless they take on more tasks and responsibilities, they're not valuable.
2 Listen to your feelings of anger, anxiety and depression. Try to recognize their nature and steps to eliminate them.
3 Set realistic goals for yourself. If you find you can only complete five tasks in one day, don't expect to complete ten.
