FARMERS MARKET... FERRIS CALF SALE... FERRIS CALF SALE... FERRIS CALF SALE...

Hay production could become state cash crop

What could be a major development for Kentucky farmers, Governor William Wallace has budgeted for developing hay production as a major cash enterprise in the state...

When you reach a point where you own a prospective customer the quality desired, you've placed yourself in a strong, competitive marketing situation.

The historical budget targets for Agriculture in the 1987-88 budget are \$1.2 billion for the implementation of a state-wide alfalfa hay grading system...

When you reach a point where you own a prospective customer the quality desired, you've placed yourself in a strong, competitive marketing situation.

The executive budget earmarks \$250,000 for equipment and \$200,000 for operating costs over the 1989 and 1990 fiscal years.

Burruss, long a leading proponent of expanding markets for Kentucky hay, described the alfalfa situation as a "dead end" and said that alfalfa would be fed to other animals...

The grading system and a corresponding additional program to advise farmers of proper production practices to enhance the state's capacity to sell the high-quality hay required by horse and dairy farmers, Burruss said.

"Horse farms in Kentucky, as well as dairy farms throughout the South, have indicated they would buy our alfalfa if it were assured of its content," Burruss said.

Beeff cattle, an alternative to Ky. tobacco, says UK

Because of trouble in the tobacco industry and the general decline in Kentucky agriculture, there has been much talk about the need for the state to develop alternative enterprises.

But there has not been enough talk about one particular alternative that actually may hold the most promise, according to Carla Nichols, Extension beef cattle specialist with the University of Kentucky College of Agriculture.

Why not increase the beef cattle production? The beef industry already has a major impact on the state economy. Kentucky already markets its beef in the country in beef carcasses, East of the Mississippi River, only Florida and Tennessee surpass Kentucky.

Beef production could be doubled by getting land taken out of crop production into pasture and through improved management practices.

"What would happen if beef production doubled?" "Unlike many proposed alternatives, the market for beef already exists in abundance," she said. "With minor modifications, market would not be a problem."

Who would this "over-production" hurt? "No one," Nichols said. "In fact the beef industry would benefit from the increased production of beef cattle since the state's economy."

The beef industry needs a supply stimulus of 114 to 120 million head. Investors are declining in most economic fields, but the demand and rising slaughter indicate a need for more cattle.

Increasing crop acreage sets plans to increase the tobacco bales, water hoses, trucks, horse collars, car ramps, chains, all kinds of small tools and farm items to numerous to mention.

TERMS: Cash day of sale. Not responsible for accidents.

ATTENTION FIRE INSURANCE

Continued from Page 10... McGold said embers started coming from the tank as he was driving, according to the report.

Four of the buckets have been taken in the past few days and have been checked.

Hughes and Kentucky State Police advise you make certain of your condition's status, if you wrote a check and/or paid a premium on a fire insurance policy, located throughout the county's boundaries.

N.C.V.P.D. responded to a wreck on U.S. 60, February 13, at 7:40 p.m. According to the report, the accident's cause was bad road conditions. The jaws of life were utilized on one of the passengers, Clarence M. Jones, 40, who was involved in the accident. All three were transported to the Nicholas County Hospital.

On February 13, the Department responded to a vehicle fire on U.S. 60, at 326 Sporewood Street. The vehicle was listed as a possibly short in the electrical wiring. Extensive damage under hood and under the dash was reported.
