MERCURY MEMORIES

5 Years Ago
Thursday, July 7, 1983

The Carlisle Community Woman's Club recently donated black wrought iron chairs and table for the front lawn of the Johnson-Mathers Nursing Home.

The rear section of the home of Mrs. Virgie Smoot on East Main Street was heavily damaged when a tree in her back year fell on the roof during a severe thunderstorm which hit Carlisle Saturday afternoon.

The Nicholas County Lions Club held their officer installation and ladies night banquet, June 28, at Vaughn's Restaurant. New Officers are; Mark Hughes, president; Ernest Seeby, first vice president; William Murell, second vice president; Richard Gardner, third vice president; G. C. Myers, secretary and treasurer.

Chester Powell, president of TTI Railroad, will be guest speaker at the annual Nicholas County Historical Society dinner Saturday, July 9, 6:30 p.m. at the renovated L & N Depot.

Old glory was waving proudly Monday, July 4, at the corner of Main and Locust Streets. It was one of several flying in Carlisle. Rotary Club members are responsible for putting flags out in the business section during all appropriate holidays.

BORN: Kevin Ray Livingood, June 25, 1983.

DIED: Mrs. Panay Owings Beatty, 78, July 2, 1983; Jimmie McCracken Muehrcke, 64, Richmond, June 7, 1983.

10 Years Ago
Thursday, July 6, 1978

"Well, it is just as simple as hell son! The first night that you went camping at Black Hawk you went snipe hunting." That was the way Charles Cox responded when asked about his memories of the once popular Boy Scout Camp in Nicholas County.

Dr. Ralph E. Wesley, formerly of Carlisle, has completed a three-year residency in eye surgery at the University of Kentucky Medical Center Department of Ophthalmology this week.

Mrs. Jane Whiteley and fellow workers at the Department for Human Resources were more than tickled to receive a new computer being used and with good reason.

BORN: Paula Rae Kinder, June 24, 1978.

MARRIED: Miss Paula June Barlow and Larry Allen Muse, June 23, 1978; Miss Joyce Elaine Blomstrom and Lt. Will Malcolm Sims Jr.; Miss Brenda Lou Mers and Michael Gene Jones, June 16.

DIED: Thomas Clayton Kimes, 82, June 29, 1978; Mrs. Jeanette Cox Jones, 70, June 27, 1978.

Thursday, July 4, 1968

Mrs. Gayle Bowen purchased the Town and Country Restaurant from Mrs. Christine Sears, who has returned to her home in Paris. Business transactions were concluded Monday, July 1.

Woody Fryman of Fleming County, star of the Philadelphia Phillies has been named to the National League All-Star staff.

This year's Blackberry Festival queen candidates are: Miss Sherlene Hutchison, Miss Jane Talbert, Mess Elizabeth Ann Price, Miss Lorrain Frey, Miss Helen Jean Berry.

BORN: Billy Mitchell Heller, July 1, Mr. and Mrs. Estill Walton announces the adoption of a son, Les Allen, 5; Tx Mr. and Mrs. Tilton Mitchell, Falmouth, a son, June 17.

MARRIED: Miss Marcia Jean Ison and Hubbard Malcolm Endicott, Jr. Saturday; Miss Juanita Brady and Merrill Vice, June 19; Miss Juanita Ruth Spigles and Fred Wayne Bowles, June 7; Barbara Maxine Hedges and Coleman Kent Gillispie, June 9.

DIED: Mrs. Margaret Herndon Brady, 77, June 27; Arthur J. Willey, 85, Maysville, June 10; Miss Minnie Plummer Dennis, June 27.

40 Years Ago
Thursday, July 1, 1948

A deed of conveyance for a tract of land containing 3.64 acres near Carlisle located on Highway 36, for the purpose of a hospital site, proffered to Nicholas fiscal court by County Judge and Mrs. Walter Shepherd, was accepted by the court in session, Tuesday.

Mrs. H. Stanley Blake, who has been appointed director of Old Age Assistance in Nicholas County will assume her duties today at the office located in the courthouse.

A two-story, metal-covered frame building at Moorefield, housing a grocery business owned by Clarence Suggs was destroyed by fire of an unknown origin late Saturday night.

PFC. Lawrence Key, now with the 82nd Airborne Division at Fort Bragg, N.C. is one of the many boys who jumped form the "flying boxcars" at Camp Campbell. He is the son of Mrs. Edith Key of East Main Street.

BORN: Terasea Lynn Ellington, Tuesday; Liza Jane Galbraith, June 29.

MARRIED: Miss Helen D. Storey and R. G. Peterson Jr., June 28; Miss Helen Marie Shrout and James Clark Lowe, Thursday; Miss Martha Davis Judge and William Malcolm Sims, Friday; Miss Alberta Napier and Eugene Wills, Sunday.

DIED: William Arthur Scott, 48, Wednesday.

50 Years Ago
Thursday, July 7, 1938

One of the longest hits of the season was recorded in the Carlisle Softball league last week when Harvey Gaunce playing with Standard, hit a fly ball to the steep bank in deep center field. the ball went over the fence surmounting the outfield bank.

A thief, trying last Friday to break into the Mercury office, was frustrated in his attempt when Martha Gatewood, whose home adjoins the Mercury, saw him trying to force the window and called Night Marshall Cassidy.

A new post office building for Carlisle sometime in the near future was assured late last Friday upon a receipt of a telegram by Mrs. V.C. Reynolds, postmistress from Congressman Joe B. Bates, announcing the government had allotted an appropriation for a post office.

MARRIED: Frances Deatley and Maxwell Dotson, June 23.

DIED: Mrs. Minnie Susan Snapp, Tuesday; David M. Jones, 24, June 29; Mrs. Lizzie R. Parrish, Saturday.

Optometrist

COMPUTER BLUES

Many people complain of headaches, burning sensations, itching, eye strain and other eye discomforts after working in front of a computer screen. There are many simple techniques to make the computer operator visually more comfortable.

- Adjust the top edge of the screen so that it is no higher than the operator's eye level, and the bottom edge is no more than 40 degrees below eye level.
- Control glare. Windows in the field of vision should be shaded. The screen can be fitted with a hood and antiglare filter.
- After two hours in front of the VDT screen, take a 15 minute break.
- Eyewear with special tints and prescriptions can make your eyes more comfortable during computer work.

Your optometrist is especially qualified to help you get rid of computer blues.

Drought and holiday mean extra caution

This year's drought adds another potential danger in using Fourth of July fireworks -- grass fires, according to Kentucky Department for Health Services safety officials.

"Anytime fireworks are used, injuries are possible," said E.P. Conyers, consumer product safety branch manager.

"But with the dry grass this year, there's a very real potential for a grass fire caused by burning fireworks."

Conyers recommends trying to avoid dry areas when using fireworks and having a bucket of water nearby.

"Water can be used to douse fireworks that are ignited but don't go off and can be used to cool used sparklers or other hot items," he said. "It's also important to have water handy in case a small grass fire does start."

Kentucky allows certain "Class C" fireworks, which generally are non-explosive types such as sparklers, snakes and smoke devices.

Fireworks not allowed under Kentucky law include bottle rockets, missile-type rockets, Roman candles, firecrackers or any fireworks that have a loud explosion or shoot into the air.

Conyers points out that all legal fireworks will be labeled with the name of the item, instructions, cautions and the name of the manufacturer.

Any firework that does not have a clearly printed manufacturer's name and address and cautionary labeling is most likely illegal and should be avoided.

In Kentucky in 1987, an estimated 117 fireworks-related injuries occurred. While the most serious injuries involve illegal fireworks, permissable fireworks can be dangerous, as well.

"Most of the injuries involving legal fireworks come about because someone is misusing them," said Conyers. The most common injuries are to the fingers and hands -- they range from minor burns to severed fingers and hands.

Conyers recommends the following safety tips to remember when using fireworks:

Fireworks are not toys. Sparklers, considered by many the ideal "safe" fireworks for the young, burn at very high temperatures and can easily ignite clothing.

A Revolution In Blade Shaving!!!
REMINGTON LEKTRO BLADE RAZORS
- Vibrating twin blades gently and closely shave hairs for the quickest, smoothest, most comfortable blade shave ever.
- High speed vibrating/massaging action, less drag . . . less pull, reduces nicks and cuts.
- Less irritation than conventional blade razors.
- Safe . . . immersible, for showers or full use. Operates on 1 "AA" battery (included) for up to 6 weeks use.
- Uses any standard slide-on twin blade cartridge (Gillette Trac II, Slack Super II, etc.). Precision technology for the very best blade shave ever.

SCHOOL

Guthrie reaching.....

Continued from Page 6

and their guests were given an over-view in the Visitor Center Theatre.

After touring the LRC Museum and gift shop the group was given a demonstration of the computer flight simulators.

NASA then offered the students advice and information concerning careers in Computer Aided Design.

What is the Research Center's main purpose?

"The overall purpose is to put in use today the concepts of tomorrow," he said.

In the information provided the visitors NASA explained their priorities as a program for a vision.

"Research and development throughout the remainder of the 1980's...so as to give our nation options... in the late 1980's...whether to go ahead and build an experimental aerospace plane... and, by the year 2000, to have operational civilian and military orbital aerospace vehicles with capacities of up to Mach 25 (25 times the speed of sound)... and commercial aerospace vehicles traveling perhaps up to Mach 12."

Guthrie explained further, "NASA actually researches new airplanes to test new and important theories for flight."

For example, the group toured the Aircraft Landing Dynamics Facility where new tires for the next space shuttle were tested.

The landing facility was formerly called the Landing Loads Track and is a national facility which tests landing equipment including gears and other various controls under specific conditions.

A recently completed improvement plan doubled the maximum carriage speed from 110 knots to 220 knots and extended the track length from 2200 feet to 2800 feet.

A new testing carriage, extensive propulsion system, and the arrestment system are the three main proponents of testing facility.

Also a new experience was the Impact Dynamic Research Facility.

Guthrie explained, "This is where NASA crashes planes into the ground to measure strain and effects on the structure."

Why are the scientists deliberately crashing planes?

First, the planes are those that can no longer be used in regular flight because of water damage but could be used for research instead.

Important information such as the hazards to crew and passenger can be sought from testing dummies and cameras located inside and out the plane when a plane is impacted at a velocity to 145 kilometers per hour.

Improvements in structure and safety have resulted from the tests.

Future testing will involve "enhancing occupant survivability in post-crash fires.

Wind Tunnels are a part of the rigorous testing involved at NASA.

"There are about 44 different tunnels and NASA has the fastest wind tunnel in the nation.

"We toured a 7'x10'' wind tunnel, although the dimensions are misleading as the actual size of the entire tupnel exceeds several hundred feet," said Guthrie.

He concluded of the tour, "The end of the tour found us at the hangar containing research aircraft where many new concepts are explored."

There is also a large educational department contained in the research center.

Said Mrs. Guthrie, "The educational department is there to show kids there are possibilities and exactly what is available for career options."

The educational department may also provide information for area high schools concerning space in general and the travel of commercial and military airplanes among other subjects.

Mrs. Guthrie said, "The Educational Resource Center there covers a five state region and information is readily available for classroom use."

Through this trip Guthrie received a scholarship to attend another activity.

"I was chosen from the state of Kentucky, as there was one student chosen from each state (with five states being included) to receive a completely paid scholarship to a five day Space Camp being held in Huntsville, Alabama.

Other participants from Kentucky included Mark Campbell from Louisville and Anthony Holland from Tompkinsville.

Guthrie is greatly interested in the field of Aerospace Engineering and now feels this goal is more of a concrete possibility rather than a dream.

"I think he now believes the things he wants are a really possibility and not out of his reach," Mrs. Guthrie.
