Miss J. A. West, of Nashville, will be spending eight weeks as an extern at Hopkins Drug while she completes her pharmacy school training at UK.

NEWS BRIEFS - News of the region and state

Mead has format changed

FRANKFORT, Ky. (AP) - State Treasurer Robert Mead CPA has changed the format of the tax-return, payroll, welfare and other checks issued by the state so that his name appears on them.
"At the top where once were only the words 'Commonwealth of Kentucky, Treasury Department,' the name 'Robert Mead CPA' has been added in larger, colored type. State officials have from time to time been criticized for using state materials to publicize themselves as they ran for other offices."
"But Mead said the check change would make no recipients would know whom to call in case of a problem."
"You reporters read politics in everything, but all I'm trying to do is help the public cut through the bureaucracy," Mead said. "I'm not campaigning for anything."
"Taxpayers were deflated when receiving the new checks in June," he said.
The company that printed the checks did not charge extra for the redesign and addition of colors, he added.

Wise decision may be delayed
GEORGETOWN, Ky. (AP) - Testimony has ended but a verdict is several weeks away in the trial of Scott County Police Chief Phillip Wise, who is accused of assaulting a man who earlier had beaten his wife.
Special Judge Ray Corns said Friday that he needed more time to review his notes and wanted to view the alleged scene of the crime before handing down a verdict in the non-jury trial that lasted two days.
Corns said the verdict would probably come in mid-September.
Wise and his brother, Gary Wise, are being tried in Scott Circuit Court on charges stemming from a 1987 Derby Day incident in which they allegedly assaulted Greg McLeroy and Bill Lewis, both of Georgetown. McLeroy had fought with Phillip Wise's son, Mark Wise, knocking out one of Mark Wise's teeth.
Phillip Wise, 41, is charged with first-degree wanton endangerment, official misconduct and fourth-degree assault. Gary Wise, 36, is charged with first-degree wanton endangerment and fourth-degree assault.

Collins raising money at Murray
MURRAY, Ky. (AP) - Former Gov. Martha Layne Collins will chair an 18-month fund-raising effort to raise more than \$8 million for the Murray State University industry and technology center that has been named for her.
Murray State President Kala M. Stroup made the announcement Friday at a board of regents meeting.

Pattus named to top spot
ASHLAND, Ky. (AP) - Effective Oct. 1, John Pattus will become president of SuperAmerica and a vice president of Ashland Oil Inc.
The appointment was announced Monday by Charles Luskien, president and chief operating officer of Ashland. Pattus will succeed Richard Jensen, who is retiring after 23 years of service.
In his new position, Pattus will be responsible for all retail operations of SuperAmerica, a division of Ashland Oil Inc. that has 495 stores in 17 states.
Pattus, a native of Springfield, Ky., has a business administration degree from Western Kentucky University and is a graduate of Harvard Business School's Advanced Management Program.
He joined Ashland's branded marketing department in 1965.

September 2, 1898
Sunny skies are in store for Kentucky for the next few days as a broad high pressure area shifts slowly eastward from the mid Mississippi valley across the Appalachians toward the east coast. Temperatures will rise to near normal levels for the balance of the week. The chances for showers are negligible for the next five days. Daily highs will reach the mid 80s on Wednesday. Lows will moderate from the mid 50s to the mid 60s by Saturday. As daytime highs move to the mid and upper 80s, the net result should be near normal corn and soybean development over the next week to 10 days.
The 8 to 10 day outlook for Sunday through the following Thursday indicates both temperatures and rainfall near normal. Daytime temperatures should be mostly in the low to mid 80s. And scattered showers could enter the picture before the Labor Day holiday is past.
The national weather service 30 day outlook for September is generally favorable for Kentucky agriculture. With conditions of temperature and precipitation averaging near normal. Since normal rainfall for September declines to between 3.0 and 3.5 inches around the state. A normal onset of fall would likely bring dry periods suitable for successful harvest of grain.
Normal September high temperatures back away from the mid 80s toward the mid 70s by the end of the month. Daily lows drop from the low and mid 60s to the low and mid 50s.
Hay making appears to have the green light for the rest of the week. However it is urgent managers take advantage of the conditions in order to take full advantage of the current conditions. Also minimize the risk of showers late in the curing period. Minimum relative humidity will be near 30 percent. Drenching high evaporative potential of near two tenths of an inch daily. Increasing south winds should boost drying action further after Wednesday.
