What Jesus Taught
By George L. Rogers
Everyone should take time to read and study the Bible. Even those who do not study the Bible should study it more. The fact that God Almighty commands the Bible should be motive enough for studying it. (2 Tim. 2:15) Many people today cannot understand the Bible and someone must explain what it means to them. For many people, the Bible is a mystery. It is very true that there are many things in the Bible as well as in nature which we know little or nothing about, but that is no reason for us to neglect to study both.

The Gospel plan of salvation and how to live the Christian life are clearly revealed in Scripture where we can constantly learn. We will only take the time to study. Man is without excuse if he does not take time to study his Bible.

The word "mystery" does not signify that which is "un-knowable," but that which is "unknown." Paul, the apostle of Christ, teaches that the Gospel is a "mystery revealed." (Eph. 3:1) This inspired writer said we need what he wrote, we could understand his knowledge in the mystery of Christ.

Studying the Bible is not merely a privilege, but an imperative. The only way for you to find out what is right is to search the Scripture with an unprejudiced mind. Those in the Jerusalem church of the first century were the first ones born into God's family. (John 3:5) They obeyed the Gospel and that is what Jesus taught. (Matt. 28:18-20)
