## Precautions to take during tornado weather

No one can stop a tornado; but there are precautions you can take to safeguard lives and property.

The peak tornado season in Kentucky is generally recognized as April, May and June.

One has to hear but one date, April 3, 1974, to remember the fury of a tornado in our state.

There is little that can be done to avoid the property destruction tornadoes bring; but tornadoes do not have to be killers.

You can take precautions when a storm threatens and thereby save lives, reduce the threat of injury and lessen property damage.

A tornado is a severe storm. The winds in a tornado turn counter-clockwise with wind speeds that vary from under 100 miles per hour to approaching 300 miles per hour.

Tornadoes do their destructive work through the combined action of their strong rotary winds, flying debris and the partial vacuum in the center of the vortex.

Most tornadoes move from southwest to northeast. Generally, tornadoes occur in the spring in the late afternoon on a hot day. But remember tornadoes can happen any time.

Easy to recognize: You'll have no trouble recognizing an actual tornado! It is a funnel-shaped cloud extending down from the base of a thunder cloud.

As it touches earth, it twists thrashing up debris in all directions.

It is usually accompanied by hail, violent thunderstorms and wind. Its noise is loud it can hit out the sound of crashing buildings and falling trees.

When the skies look threatening listen to the radio. The National Weather Service and the Severe Storm Warning Center track all weather systems with sophisticated radar and are usually able to give adequate advance warning of violent weather conditions.

A tornado watch means that atmospheric conditions are such that tornadoes could develop.

A tornado warning means an actual funnel has been sighted in your area.

Warnings are usually accompanied with a description of the speed and direction of travel of the funnel.

When a watch is issued, listen to broadcast advisories, and be ready to take cover. Turn on bright headlights and radio and have family members within earshot under watch conditions. Also, take your car keys; you can still be operated in the rubble.

Immediate action saves lives. When a tornado threatens, immediate action can save lives.

Stay away from windows, doors, outside walls and protect your head.

In homes or small buildings, go to the basement or a place in the middle of the house, like a closet, bathroom or interior wall. Get under something sturdy.

In school, lie calm and follow the directions of your teacher. Stay away from multi-story buildings. If there isn't any a small hallway or under a table.

By thinking clearly and calmly and helping one another, Kentuckians can limit the injury and destruction tornadoes cause.

Severe weather ripped through Nicholas County last week, uprooting trees and damaging property. These pictures are from Morefield Road. Two were sent to Nicholas County Hospital following an apparent tornado, which destroyed a trailer.

## Severe weather, storm cause county a variety of problems

The creek edge in East Union. As far as the rainfall goes, it seems the East Union area of the county got the brunt of it, Kelly said.

No other instances of flooding were reported to the Nicholas County DES office.

Amulance driver Ronald McDonald, however, reported sighting a momentary tornado touchdown in the East Union area at approximately 7:30 in the evening.

Thunderstorms reared through Nicholas County all day and evening Wednesday, such increasing in severity as they rumbled through. Although the amount of rainfall in the area varied they did not amount to an exorbitant sum, Gene Kelley, Disaster and Emergency services representative said.

According to Kelly, rain fell for the 24-hour period from 9 a.m. Wednesday to 9 a.m. Thursday amounted to about a bit under two inches of wet waste water treatment plant.

However rainfall was responsible for what Kelly termed several minor flash floods in Nicholas County primarily around vicinity of East Union road.

In places, water had overflowed the creek, gullies and the country roads surrounding trailers and homes, Kelly said. In addition, the loading dock at Magee Image and the Ambulance service entrance at Nicholas County Hospital reported water standing from four to six inches deep.

"Most of the flash flooding occurred in the hollows along

## GENERAL NEWS

### Ford addresses .....

Continued from Page 1

stiven to keep his speeches short.

"Graduates, he said, must exercise their rights in the open political process which stands as one of the very foundations of the United States.

"Who would have believed that in the past year we have seen the fall of the Berlin Wall, who would have believed we would have seen Soviet Russia's prevailing philosophy crumble, that in Czechoslovakia the role of a dictator would give way to a playwright or in Poland, to a shipyard worker.

"These changes have brought through the vision of young people. By far the most outstanding example of the power of young people in the scene were young unarmed students faced down tanks in another \$50 billion. In all, we are looking at a \$100 billion deficit in the balance of trade," Ford said.

It is a primary responsibility that this imbalance can be lessened, he said.

"Oh yes, there is a great big beautiful world out there but it is only great if you work to keep it great. I know Nicholas County and its adherence to good family values. Be better educated, make it a standard as the first graduating class of the decade of the 1990s and the graduating class of the last decade of the century," Ford said.

Concluding, Ford handed the proceedings, to Superintendent Donald Miller for his 23rd and final graduate commencement exercise.

Elder made closing comments as a follow up to Ford's address.

"Like you, I am leaving one phase of my life and beginning another and I have found the true measure of a person's ability to succeed is the ability to fail and get back up to try again. Never let something knock you down and if you get down, Elder said.

Education improves and increases our ability to produce better and more advanced technology and to constantly introduce new innovation and change in the industrial society. In Europe, where Germany is gradually working toward reunification, they have an estimated level of productivity about of the United States by \$50 billion. In Japan we are already behind in industrial trade by another \$50 billion. In all, we are looking at a \$100 billion deficit in the balance of trade," Ford said.

Ford said there are people who want the American Dream, which he described as being the pursuit of personal, political, and economic freedom.

"There are two ways in which we can pursue our freedoms, we can fight for them, or we can work to keep them the way they have existed for over 200 years by taking part as fully as possible in the United States political process," he said.
