**"It's easy to praise something
 you're convinced about—like
 geothermal heating and
 cooling."**

"All we build is total electric. We
 choose homes—and so far, 17 of them
 have incorporated geothermal heating
 and cooling," says Darrell Nunneley
 of Nunneley Builders. "We've been getting
 outstanding feedback about the extremely
 low operating costs of these geothermal
 systems."
 Geothermal—the heat pump that uses
 the nearly constant underground
 temperature—warms your home in winter,
 and cools it in summer, at incredible
 savings. It even provides free hot water.

 KU office or a heating and cooling dealer
