Success Story

In January 1991 after experiencing severe headaches, I consulted Dr. Pretzsch's office and had an appointment to see him within the same week.

I was truly impressed with the technology of his office. The new machines to test for cataracts and also to test before examination whether or not you need a prescription. After my examination Dr. Pretzsch was able to determine that I did need glasses. His staff was very helpful and courteous.

I was very underwhelmed on the day of glasses and the staff was extremely helpful in my decision. I was also very impressed with the large selection of lenses and the fact that the in-store lab was able to get my glasses ready in two hours even though I was there on Saturday. I am very pleased with the look of my glasses and have had several good comments made about my selection. Believe me I am very glad I decided to visit the eye doctor. I can see the world much better without those dreadful headaches.

I would highly recommend Dr. Pretzsch's office to anyone experiencing vision problems. Even if you think you have perfect vision, don't be fooled! Though my eyes were perfect as well. Go on for your eyes to be sure, you may not know what you are missing.
