## Weight Loss Surprises Researchers

**WASHINGTON** — A nutrition organization was surprised that a nutritionally complete "lite" food additive would cause significant weight loss.

Without other studies and scientific support, researchers in Europe found that the ingredient, a natural plant extract, actually caused people to lose weight, even though specifically instructed not to alter normal eating patterns, according to a study published in the prestigious British Journal of Nutrition.

Researchers in an earlier study had reported that the weight loss was due to an increase in the intestinal absorption of nutrients.

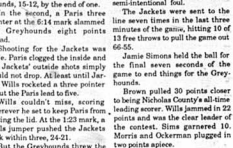

While the development of the product was the result of a project of the National Institute of Health, the researchers did not expect the results. "Not only have I lost 30 pounds but my cholesterol dropped from 232 to 141. I have two flowers in my yard that I had to trim. In a separate report a telephone interview revealed that a Wilmington, North Carolina pharmacist lost 14 pounds in a week on the product as well.

Food Source One tablets are part of National Dietetic Research's comprehensive plan to bring a rapid end to obesity in this country. A variety of nutritional sound diet plans, specially prepared by HDR, accompany each bottle and provide a satisfying, drug free alternative for confronting the problem of obesity.
