Not Just For The Young
At Heart!
Being young at heart doesn't make you immune to health problems or
medical emergencies. In fact, 45 percent of all heart attack victims
are under the age of 65!
And for my heart attack victim, time is critical. Because every second a heart
attack goes untreated, heart tissue dies. Permanently. And the more tissue
that dies, the greater the damage is to the heart. Taking precious time to drive
into Lexington when you are having chest pains or other symptoms of a heart
attack could in fact prove to be fatal. Statistics show that 1/3 of all heart
attack victims will not survive — due in large part to delays in starting effective
emergency treatment. Your best chance for successful recovery from a
heart attack is immediate emergency care.
The Emergency Room at Bourbon General is staffed 24 hours a day by highly
trained professionals who know how to handle cardiac emergencies. And
we're right here in Bourbon County — close to home when you need us.
For more information on
Bourbon General Hospital, call 987-3600.
