"When mom was diagnosed with breast cancer, suddenly a mammogram fit into my schedule."

When mom was diagnosed with breast cancer, suddenly a mammogram fit into my schedule. I've heard one in ten women will develop breast cancer. But soon that one woman was my mother. A mammogram was never a priority.

GENERAL NEWS

Letters

As was supposed to represent the best interest of the students, their parents and the school. Apparently they feel it's their own interest and none of ours or Mr. Gilbert's business. A person should have a chance to defend himself, not be kept in their job by the law or by committee, which would require their supervisor to state ways that a person can improve their job in order to keep their job. The concept is an issue of fairness, that we all would claim that we deserve in our jobs. Isn't it fair to let a person know that they are in danger of losing their job if they do not make certain changes or adjustments? Wouldn't it have been fair for the Nicholas County Board of Education to let Mr. Gilbert know what they didn't like about the way he was doing his job? What is it that we want from our Nicholas County Schools? We would like to remind you of the following: Nicholas County Elementary School had walls, four classrooms and a library were added, and a new bus garage was built, roofs were replaced on both school buildings. Computers have been placed in every regular classroom at the elementary school and all the computers in the high school lab have been replaced. New school buses have been bought each year. The girls basketball team success over the last four years

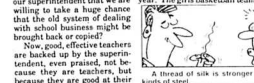

has won both the Class "A" and state tournaments, and both are the result of employing a state Class "A" Tournament this year. The band has placed high in several competitions and went to state competition last year. The high school cheerleaders won the competition and the high school swimmer team won the league. All the requirements for the Kentucky Reform Act have been started including centers for families and children's needs. More scholarships were earned by Nicholas County High School seniors than ever before, the buildings and grounds are better kept than anytime in my memory. A weight room at Nicholas County High School and a new recreation stand for the football field have been built. There is a sense of pride among the students and teachers. People feel welcome in our schools. I could go on but I am sure those of you who care are aware of all the ways in which things are better.

Yet the Nicholas County Board of Education, our elected officials, do not reline the one man who deserves credit for most of these things for some reason too terrible for the rest of us to even know. I have been so much more success over the last four years

Babies of '93

David Vincent Nagpliano
John Denny Nagpliano
Great Grandsons of Grace Weaver of Carlisle, and late Denny Walters.

A thread of silk is stronger than the same size thread of some kind of steel!
