HELPFUL HINTS

Bright Ideas On Night Driving

(NAPS)—According to the National Safety Council, your chances of being involved in a traffic accident are over three times greater at night. Heeding these hints from Shell Oil Company may help keep you out of such a statistic.

- You should be rested and alert behind the wheel. If you're driving for a long time, stop every two hours to rest.
- If you're wondering whether it's time to turn on the headlights, it is.
- Try looking into the outer edges of your headlights' range. You're more likely to spot trouble in time to avoid it.
- If a car comes at you with high beams on, watch the side of the road till it passes.
