OF HEALTH

News You See 'em—Or Maybe You Don't
(NAPS)—Who says braces are just for kids? Certainly not the estimated one million adults in the United States and Canada who have chosen orthodontic treatment as the route to better oral health and confidence.

As new plastics and retainers as well as laser assisted and retainer surgery are used, orthodontic treatment is becoming more and more popular.
What's more, today's retainers also come in various and colorful other than the traditional out-of-mouth, pink, or white plastic or metal-sprayed-on metal, unknown to most consumers as being a mild pain or place-on-the-crown of an else manner—beyond that great smile that's soon to be glad to file.
