LETTERS TO THE EDITOR

Nicholas County History is available
Dear Editor,
As I was helping two young ladies recently with research regarding a family course they are taking, I realized, from the comments of one of them, that there is a whole new generation of young people out there who do not know the HISTORY of their county.

More people with job means more people with money. This has helped Kentucky achieve the best financial outlook in modern times. We will pass ahead the next administration "truth" of about \$100 million, the largest such reserve in history.

Special commendations are in order for everyone who gave time and money to the Nicholas County High School senior trip this year.
In the 10 years that NCHS has had senior trips, there NEVER has been a mishap.

Nicholas Counties will be proud to know that Dr. James H. Hester, general editor of THE HISTORY OF THE NICHOLAS COUNTY, has listed HISTORY OF NICHOLAS COUNTY as among the four best county histories in the state.

We have reduced by 19% the number of Kentuckians who were injured in non-injury crashes. We haven't just said it. We've done it.

KSP investigates crashes
The following report was given to The Mercury by Kentucky State Police Public Affairs Officer Jan Wucher of the Dry Ridge Post on Tuesday, April 4:

"In Nicholas County, the 1994 unemployment rate was 6.5 percent."
The problem is, the jobs aren't evenly distributed throughout the state. In Nicholas County, the 1994 unemployment rate was 6.5%. That's why our Economic Development Cabinet has been diligently working to attract new companies to Kentucky and to keep existing businesses here.

Poster contest finalists named
