ARIES (March 21 to April 19) A genuine business opportunity arises, but you could be doing with a person who's touchy and overly sensitive. This puts you off for the time being. However, by week's end, the situation is resolved to your satisfaction.

TAURUS (April 20 to May 20) Confusion surrounding a business matter could end up costing you. Get to the bottom of what's going on. Recreational interests, travel and fun times with friends.

GEMINI (May 21 to June 20) Some could receive a job offer that can be done from the home. This is the wave of the future and it should be considered quite seriously. The middle of the week brings unexpected visitors who drop in quite inconspicuously.

CANCER (June 21 to July 21) Activities with children are a definite now. Partners seem to communicate by ESP since they're so in tune with each other at this time. Something you say later in the week could be taken the wrong way by someone who's overly sensitive.

LEO (July 23 to August 22) Intuition puts you on the right track regarding a career concern. You could be considering making a major purchase for the home or family now. However, make sure you do some homework on this score. Guard against extravagance.

VIRGO (August 23 to September 22) You'll have to be extra calm and patient, but try to administer some tender loving care. The weekend looks good for travel and fun times with friends.

LIBRA (September 23 to October 22) The week brings positive financial developments but you could have mixed feelings about a social invitation received. Consider this carefully since there could be an emotional person just waiting to make your acquaintance.

SCORPIO (October 23 to November 21) You'll certainly be impressed when you see this week. However, a child will feel hurt if you don't share quality time together. Make sure to set time aside. A family member is cranky this weekend.

SAGITTARIUS (November 22 to December 21) While shopping for the home isn't especially favored now, you'll be pleased about all the career developments which arise. You're ready now to take a project off the back burner and give it your full attention.

CAPRICORN (December 22 to January 19) It's a great week for traveling and visiting with friends, especially for those who are on vacation now. An acquaintance could show a romantic interest in you later in the week, making you by surprise.

AQUARIUS (January 20 to February 18) You could forget where you put something important. Don't fret. Relax and think about where you saw it. You could receive financial backing for a project.

PISCES (February 19 to March 20) You could be overly effusive in personal dealings this week. Still, the week should bring happy times in the company of partners and friends. This weekend, accept invitations which come your way.

Dear Abby

Patient Who's Kept Waiting Won't Stay Kept for Long

By Abigail Van Buren

DEAR ALICE: I must respond to "Dear Alice" who writes with suggestions about what to do while you're waiting to get to see a doctor or dentist. I should advise a patient who has an appointment to wait in my doctor's or dentist's office. If you have an appointment, I expect to be seen within a reasonable length of time, or if there isn't possible the receptionist — someone from the office — should come and let me know that there will be a delay, and give you the option of waiting or rescheduling the appointment.

The least mature of people have to wait in a doctor or dentist's office not because that hour, with explanation of how much longer the wait will be. I, for one, will not be subjected to wait more than 20 minutes without some kind of explanation. I can deal up with a very professional attitude who try to calm an impatient patient who is waiting. I should be offered if I asked them to please call Charles by his given name, and I value their friendship so much to ask it.

DEAR ALICE: I wish to respond to the widow who encountered a crime committed on her husband's critical condition in front of him as he lay in a coma. I'm a nurse, and we are taught to nursing about that the last nurse to go to a hearing. That nurse was not of him, and obviously, very nervous nurse, she left the receptionist.
