Country Chatter

Paty Cline, who died in a plane crash in 1963 when she was in her early 30s, has become one of the top sellers of country and western music around the world. It seems the generation that discovers her amazing God given talent becomes as devoted to her as her original fans were, and are.

What this tells us about the power of country music and country stars can probably help us up a huge book about fan rallies and star magazines. I've been getting some interesting mail about what Paty's apparently permanent patin' with TV producers. Many of you feel she's being deliberately kept off the air because her previous comeback had failed. If so, it's not so. I hear she herself wants to be very, very busy about the format of anything she may do the next time she takes a trek down television way.
