WHAT IS THE EDUCATIONAL PREPARATIONS FOR PHYSICAL THERAPISTS?

This is not a question answered easily or correctly by most Individuals in today's society.

Physical therapists are college graduates, with such pre-requisite classes as psychology, biology, physics, statistics, chemistry, English, professional writing, and humanities. Once they have completed a well-rounded basic college education, it's time for them to apply to an accredited physical therapy program of their choice.

If accepted into a physical therapy program, the student is extensively schooled in such fields as human anatomy and physiology, life span, neuroanatomy, and many other medically related courses. Within the program, the student will have many opportunities to apply and integrate classroom learned theories into practice through extensive clinical education offered through a variety of practical settings. "Clinicals" are scheduled periodically throughout the PT program for student in order to give them a large amount of hands on experience prior to graduation.

Depending upon the school chosen and the level of education of the program, the new graduate will have achieved a Bachelor's Degree or a Master's Degree in physical therapy. The opportunity is open to them at this time, to contin ue their education and obtain a PhD in physical therapy.

Finally, before beginning practice as a physical therapist, the individual must pass a licensing examination in the State in which they wish to practice, certifying them as a Licensed Physical Therapist. To be eligible for State licensing each year a Physical Therapist must complete accredited continuing education courses.

There is "much to learn" for the PT, and the educational process is forever ongoing, as this ensures quality patient care in the professional field of physical therapy. We at the Physical Therapy Centers of Ashland, Grayson, Wheelersburg, and South Shore are dedicated to providing each patient the most current therapy, thorough treatment, and highest quality of care.
