Taking The Worry Out Of Retirement

(NAPSI)—For many people, the time spent in retirement will be nearly as long as the time spent in the workforce. Many studies have confirmed, however, that Americans are not saving enough for the amount they should provide for a secure retirement. Proper planning, however, may provide you a real risk of outliving their income.

A product that can take some of the worry out of retirement is a variable annuity—a contract issued by an insurance company that generally provides for two strategies. The accumulation period during which the value builds and income taxes on the income are deferred. The payout period, when the annuity is distributed. THEN NOW!

Income Taxes. Here are a few facts about your income tax that may pay you to know. When the U.S. adopted a national income tax in 1913, the initial revenue code was 14 pages long.

Now, the annotated code fills 14 volumes—more than 11,500 pages of small print. Under the original code, only one four-page form (including instructions) was needed. Now, the IRS publishes more than 400 separate forms and over a hundred instruction booklets. Today's encyclopaedia of IRS forms runs to more than 1,000 pages.

Justice Wintersheimer notes Supreme Court decisions

Dear Editor: It has always been my belief that the Constitution is not a static document. It is a living document that evolves with the needs of the people. The Supreme Court's decisions in the past year have reinforced this belief.
