Carter man dies in wreck on KY 7

An Olive Hill man was killed and three other persons were injured in a one-vehicle traffic accident Sunday afternoon about three miles south of Grayson on KY 7, according to police.

Kentucky State Police in Ashland said Phillip M. Landers, 45, was pronounced dead at the scene.

Landers was a passenger in a 1988 Ford Escort, driven by Barbara Campbell, 39, also of Olive Hill. She was driving southbound on KY 7 when she lost control, the car crossed the northbound lane, overturned several times and came to a rest upside down.

Campbell and other passengers Dustin Campbell, 19, of Olive Hill and Debra Marshall, 23, of Rush, were all taken to King's Daughters Medical Center where they were treated and released.

Landers and both Campbells were not wearing seatbelts, police said, but it is unknown whether Marshall was.

KSP investigate finding explosives in Montgomery

Kentucky State Police in Morehead along with agents from the bureau of alcohol, tobacco and firearms, state police hazardous device unit, Montgomery County Sheriff's department and Mt. Sterling Fire department are investigating a residence fire in which explosive devices were found.

The fire department responded to a residence fire on Camargo Road around 6 a.m. Thursday, Aug. 30, and extinguished the blaze. The home then caught fire again at approximately 3:15 p.m., and when the fire department responded the second time, explosive devices were discovered.

An undetermined number of explosives were confiscated at the scene.

KSP Det. Tim Planck heads up the investigation.

Fun, fitness class at MSU

A variety classes for fun and fitness will be offered this fall by Morehead State University's Office of Continuing Education.

Additional information and registration are available by calling 783-2875.

Federal Consumer Protection has confirmed the accuracy of the fuel saving described in this advertisement.

Device May Increase Gas Mileage by 22%

BOSTON – National Fuelsaver Cupp of Boston has developed a low cost automotive accessory called the Platinum Gas Saver which is guaranteed to increase gas mileage by 22% while meeting all emission standards.

With a simple connection to a vacuum line, the Gas Saver adds microscopic quantities of platinum to the air-fuel mixture entering the engine.

Platinum has the unique ability to make non-burning fuel burn. With platinum in the flame zone, you increase the percentage of fuel burning in the engine from 68% of each gallon to 90% of each gallon, a 22% increase.

Since unburnt fuel leaving an engine is pollution, this 22% of each gallon would normally burn when it reaches the platinum of the catalytic converter.

Unfortunately, the converter's platinum burns this fuel in the tail-pipe, where the heat and energy produced from burning this fuel cannot be harnessed to drive your vehicle.

But when the Gas Saver adds platinum to the air-fuel mixture, 22% more of each gallon burns inside the engine so that 22% fewer gallons are required to drive the same distance.

After studying this process for five years, the government concluded: "Independent testing shows greater fuel savings with the Platinum Gas Saver than the 22% claimed by the developer."

In addition to this government study, the Gas Saver has received patents for cleaning out carbon and raising octane, thus making premium fuel unnecessary for most vehicles.

Joel Robinson, the developer, commented: "We have sold almost a half million Gas Savers. To our surprise, as many people buy the Gas Saver because it extends engine life (by cleaning out the abrasive carbon deposits) as buy it to increase gas mileage or to raise octane."
