## PENTAGON FROM

And the proposal is testimony to the ambitious agenda of an administration that believes there are too many strings binding the powers of the executive branch and preventing efficient management of the federal bureaucracy.

On Capitol Hill, the proposals have already raised eyebrows.

"Most of these oversight devices have not sprung from the imagination of an overzealous Congress. They have a history in the defense budget of the Vietnam and Reagan eras," said Rep. John M. Spratt Jr., of South Carolina, the ranking Democrat on the House Budget Committee.

"They came from the need for greater oversight on the part of the DOD. As you spend more money and you spend more money on new systems, you want more oversight of those systems, more baseline to measure against, not fewer. It's of concern to me that administration is asking for more money but less accountability."

The Rumsfeld Pentagon is hardly the first to complain about Congress. In an attempt to impose, with a budget so tight that it is almost impossible to do, more efficiency and oversight is persistent and inevitable. Every new administration vows to do something about it.

But the current effort stands out in several regards, according to senior administration officials and defense analysts.

It is driven by an administration that has been loath to share information with Congress and the public and has openly chafed at oversight, fueling suspicions about its motives on Capitol Hill.

Although previous Pentagon efforts have focused on cutting red tape and changing internal management practices, this initiative is part of a larger administration-wide effort to fundamentally alter the relationship between the executive branch agencies and Congress, senior administration officials said.

"The interest was not restricted to DOD. The vice president was interested. The Secretary Rumsfeld did want to know them, so this has to be seen within that context."

For Rumsfeld, the context is necessary. Although the war on terrorism has highlighted the military's strengths, aides say he hopes his most lasting legacy will be trimming congressional oversight of the Pentagon and reforming how the Defense Department manages itself.

Deeply interested in his experience as a business executive, Rumsfeld has repeatedly urged to the bureaucracy he says hampers action at the Pentagon.

His concerns range from the mundane to the essential: He has called for an end to the lengthy financial disclosure statements he is required to file, for example, and expressed dismay at the time his employees spend answering to Congress.
