Remember Your Recare The importance of regular examinations Taking good care of your teeth and gums should be like taking care of most of our patients for a check-up at least once every three to six months. We refer to your checkup visit as a recare appointment. A recare dental visit can take up to an hour. Your checkup will normally include a complete cleaning, a fluoride treatment, any required radiographs and a comprehensive dental examination for cavities or other problems. If there are no problems needing treatment, we probably won't see you again until your next recare appointment. Giving your teeth regular checkups is the only way to keep them in tip-top shape. Recare visits help to catch dental problems like decay before they turn into painful cavities. Routine dental examinations can detect life-threatening diseases like oral cancer in the early stages when they are most treatable. That is why most dental insurance plans cover at least two recare appointments per year. Insurance companies know from experience that regular recare is a great long-term investment in your health. We encourage you to book your recare appointment well in advance. If you aren't sure when you're eligible for your next one, don't delay - give the Carlisle Office of Mortenson Family Dental a call at 289-5418. Good dental habits will help your teeth last a lifetime! Everyone deserves a healthy smile. \$69 New Patient Exam!
