CX Series  
A Versatile Workhorse  
And Driver Comfort

The CX Series (23 hp - 102 hp) is as rugged as they come — without being tough on the driver. The CX provides unsurpassed power with its high torque, low burning turbo engine. And its AutoShift transmission improves operator productivity. Daily service maintenance is easier with a full-PT, one-piece hood providing access to the oil filter, engine, and radiator. For heavy, business and medium-duty field work, the CX delivers all the power you need, with maximum operator comfort. As it has since 1951 — the McCormick brand means quality.
