LOCAL NEWS

JERRY Frzman said "They said he could play again when he could run the length of a football field. I spoke to him as he was leaving the hospital. He was a mild sprain." Coach Frzman handed out equipment to a few of the team members at practice Monday after school. Many of the players did not attend. "It's hard. Young men are very resilient," Coach Frzman said as his players walked off the field, many with their heads down. "But this... Well... This is just real hard." Coach Frzman described Jerry Patton quickly when asked about Patton's character. "He was big-sized for a young man his age," he said. "But he was gentle. He and his brother were two of the most respectful players I've ever coached. He was a great football player, but he was an even better young man."

Working the Tooth-fairy overtime Although a 2nd-grader losing teeth is hardly an unusual event, what happened in Mrs. Willis' class on Monday, Aug. 10, 2009 had to set some kind of a record. Not only was that the first day of school class, was regularly interrupted as a student after another announced, "I just lost a tooth!" By the time school let out, five of her students would be going home with one tooth fewer than what their parents had sent them to school with. Mrs. Willis took the situation in stride, helping to turn what is a landmark event in the children's lives into a fun and memorable experience. Pictured from left to right are Morgan Watkins, Taylor Hunt, Alyssa Branham, Austin Shroat and Jordan Purvis.

See Obituary for Jerry Patton on Page 3

R.W. Combs Elementary School in Perry County was closed on Monday after administrators learned of two unconfirmed cases of viral meningitis. The school's principal told reporters that the students, who are in the same family, are at the University of Kentucky Hospital.

Last week Nicholas School Information Officer Hank Bond released the following statement:

Nicholas County School officials have been informed of a student who is hospitalized with viral meningitis. According to family members he is receiving treatment at this time. While rumors are running rampant the information has been confirmed to be viral meningitis. For additional information go to the Center for Disease Control and Prevention Website: http://www.cdc.gov/meningitis/index.html

As a precaution Nicholas County School personnel have begun taking action to properly clean and disinfect areas where the student has come in contact throughout the district.

"We have assembled our team and are working to put all procedures in place to protect everyone to the best of our ability," said Supt. Greg Reid. "It is our ultimate goal to protect the welfare of our children at all times."

Should there be additional communication necessary we will continue to utilize the One-Call system, notes to parents and the district website.

For additional information contact your healthcare provider or the Nicholas County Health Department."

Following Patton's death, the school issued a second release. "The Nicholas County Schools family shares in the grief following the passing of one of our students."

"The family will remain in our prayers as they begin to try and
